## News & Reviews

### GAMES NEWS 16

The first game in four Di Melbourne House goes one D better. And every TV games centre addict's favourite tale has translated to computer. Play *Dances*. Attack on the Vic and Atari. Four parts of the latest software for all machines.

### ARCADE ACTION 30

Tip on surviving beneath a pyramid on the trail of Patachian's gold. Plus Ron's hope for other mixed adventures and puzzle can now be played by computer. Take on a friend on the tilting lost pirate.

### REVIEWS 104

The decline and fall of the Roman Empire on your Spectrum arcade bit. Or converted for the Atari, plus Spectrum owners end up down a blind alley.

### NEXT MONTH 5

News of our July offering including another fascinating competition for Spectrum and a general supplement for the keen collectors of our games listings.

## Listings

### QUICKDRAW 32

Howdy partners. This town ain't big enough for both of us — so you and your darn Apple computer better saddle up and get out. Either that or learn a quick draw pretty swift. You catch my drift stranger?

**SUBSTRIBE 40**

They run silent and run deep these deadly denizens of the deeps. The good ship T1 99/4 is out to hunt them down.

**BAT AND BALL 44**

Howdy! Get in shape for the cricket season with this reincarnation of one of the very first video games. For the BBC models A or B.

**WANTED**  
IN 45 STATES

KILLER \$255  
LIGHTNING \$10  
THE RINGO KID \$200

### CANNON MASTER 64

Perched like a vulture high atop a heavily armed battle tower you await the enemy attack. Cosmic attack for the ZX81.

**THE BLACK BOX 70**

Dare you open the Black Box and discover its inner secrets? We dare you! Unlock the mysteries of the box with your Spectrum.

**TRENCH 78**

The deadly Death Star is back — and twice as mean. Can you destroy it before it wipes out your corner of the Dragon universe?

**PROTECTOR 48**

Beware the space pirates skipper. They'll do you a mischief and that's for sure. Unless you can spike their guns afore they gets you and your mate Vic.

**SNAKES 53**

More slippery customers, this time for the brand new Onic computer. A first for C&VG. And what a way to start!

**THE TEN COMMANDMENTS 54**

Holy Moses! This is a tough task for even the most seasoned games player. A biblical epic for the Atari 400/800.

**ROYAL ASCOT 60**

Fancy a day at the races with some cash to tinker away on the page? Well roll up to your jolly old Sharp M2-90K and check out the odds.

## Swords and surgery

Do adventurers get you down? Does the troll on the bridge, refusing all treasures make you tense?

Can trying to find a way out of the coloured mirror maze, make you look at yourself in a new light? Here at *Computer & Video Games* we've seen too many fine adventurers go to the wall — and end up hanging their heads on it.

We know the pain and suffering a tough adventure can cause and we've opened up a helpline to Keith Campbell. Keith knows his way out of more adventures than most trolls have had hot dinners. Those he can't help with, he will throw open to the C&VG readership, to find an answer. All on page 83.

## Features

### MAILBAG 7

More of your questions answered.

### COMPETITION 10

Write a program for Daxos and you could win an Atari 800.

### BUGS 25

Will the bugs be converted to a user friendly brand of man?

### GO 27

Find out why this game is more popular than The Ten Commandments in Japan.

### DRAGON GAMES 28

Ron Polton tells you how to get more software for your Dragon courtesy of the Tandy Colour Computer.

### SOFTWARE FORM 68

All you need to know about getting your game printed in your favourite magazine.

### ADVENTURE 83

Reached an impasse on your latest adventure? Now help is at hand.

### CHESS 84

Max Braxner and the Duchess.

### WARPATH 86

It's Ron Polton again — this time hoping the cavalry arrives in time!

### GRAPHICS 93

Garry Marshall brings eyesight to "blind" music.

### MACHINE CODE 98

Ted Ball's half term test. Have you been playing designer? Find out here!

© Computer & Video Games Limited ISSN 0261-3087

Cover: Stuart Emerson. Next issue: June 1983.

All of this.

For the price of this. Only £139.99\*

For one month only,\* you can get a complete Commodore computer system for the price you'd expect to pay for the VIC 20.

It's a complete computer system: a Commodore VIC 20 computer, a cassette unit, a simple explanation of computer programming—"Introduction to Basic Part 1", plus an exclusive compilation tape of four computer programs, (Blitz, Type-A-Tune, Race and Hoppit).

And, while stocks last, all that can be yours for just £139.99. Which is almost exactly the price you'd normally have to pay for the VIC 20 alone.

There's only a limited number available, so we recommend you visit

your nearest VIC 20 stockist as soon as possible.

#### ALL ABOUT THE VIC 20

They say it's the best home computer in the world, and no wonder! There are educational programs for 5 year olds and up (spelling, physics, arithmetic etc.) Plus music, typing, chess and home accounts. And, of course, all those marvellous arcade games.

You'll soon be exploring new worlds of colour, animation and sound. With a vast choice of programs and unlimited scope for entertainment. All right at your fingertips.

\*Or while stocks last. Details correct at time of going to press.

YOU CAN SEE THE VIC 20 AT ALL BRANCHES OF DIXONS AND WALLACE HEATON, AND AT SELECTED BRANCHES OF BOOTS, RUMBELOW'S, LASKY'S, CURRY'S, GREENS, ORBIT, MICRO C, RANK XEROX, WIGFALLS, SPECTRUM, COMET, JOHN LEWIS, WOOLWORTH, REDIFFUSION, CO-OP AND OTHER GOOD RETAILERS.

ALSO AT BRANCHES OF A NATIONAL NETWORK OF COMMODORE COMPUTER DEALERS

**VIC 20**

**The best home computer  
in the world.**

## NOW LET OFF SOME STEAM

We've had a few unfortunate experiences with software but luckily in our privileged position we can vent off some steam through the C&VG Reviews pages.

Up until now, you have not had the same opportunity to warn people about your own software disasters.

Now, things are different. C&VG is going to give over a page or two each month to Great Software Disasters, which will be written by you, the readers.

If you have bought a piece of software — or a peripheral, or even a computer — which you feel does not live up to its marketing blurb please write in and tell us.

Reviews of bad software are just as important as reviews of good. And we strongly feel that the software houses which really do believe in quality rather than putting out any title which may make a killing in the short-term, should be supported. The only restriction we will put on this column is that the manufacturers will be allowed a right of reply before we publish.

The first offering is a delightful rundown of one man's experiences with an Orc Computer. Keith Ollett is the man behind Aetinc Bloodaxe or How I Learnt to Live With an Orc. Not only does it tackle one man's struggle to adapt to a new micro but it does so in a way that had most C&VG staff stifling giggles and we also get the feeling that before too long Mr Ollett is going to form an undying affection for the new companion in his life.

Read about Aetinc Bloodaxe next month and if it reminds you of some of your own experiences in the microcomputer market then write and let us know. It doesn't have to be as long as Mr Ollett's piece, just long enough to get your views across.

**NEXT**

**WINTER**

centre readers

There is a whole host of new games cartridges plus a range of new machines, like the Vectrex and the Colecovision. All of which gives us more to tell you about each month.

C&VG already leads the rest in its information on the video games scene, so for the latest news and the most trustworthy reviews test out our expanded Video Screens section next month. After all, the next generation of microcomputers may well burst out of this market.

**NEXT**

**WINTER**

ly capable of. But they are still ready to pull out a few surprises.

Like Tip Top, a 3D version of Donkey Kong which sets an explorer down in the jungle, dodging 3D coconuts as he tries to get his own back on a mischievous ape.

There's also a rundown of Buck Rogers, the futuristic space ace who has found his way into a video games cabinet and the night way to approach the World War II game Frontline.

Plus arcade tips on new favourite Donkey Kong Junior.

## COMPUTER GAMES TOP TEN

### Sinclair Spectrum

- 1 The Hobbit (Melbourne House)
- 2 Arcadia (Imagine)
- 3 Penetrator (Melbourne House)
- 4 Horacio Goes Skiing (Psion)
- 5 Time Gate (Quicksilver)
- 6 Flight Simulation (Psion)
- 7 3D Tunnel (New Generation)
- 8 Blind Alley (Sunshine)
- 9 Spectral Invaders (Bug Byte)
- 10 Planetoids (Psion)

### Vic 20

- 1 Jelly Monsters (Commodore)
- 2 Choplitter (Creative Software)
- 3 Star Battle
- 4 Blitz
- 5 Sargon II Chess
- 6 Skramble (Rabbit)
- 7 Gort
- 8 Cosmades (Bug-Byte)
- 9 Vic Panic (Bug-Byte)
- 10 Nopit

**NEXT**

**WINTER**

There's games in them that pages of the July C&VG.

Games enough for everyone as we are packing in an extra listings-only section. 32 pages packed with versions of popular games for all kinds of microcomputer — on top of our normal selection of games programs.

Spectrum owners are in for a bouncing climbing treat with both Donkey Kong and Donkey Kong Junior putting in an appearance on their machine. Donkey Kong features the second screen of the arcade game with fires and ladders and Mario knocking the pigs out of the construction below Kong's feet.

DK Junior features the vines, snap-jaws and fruits of this increasingly popular arcade game.

Defend, Bug Battle, Spike Attack, Meteor, Draughts, Labyrinth and old favourites, like Munchmen and Nink's Invaders will be among the titles to take your mind off the forthcoming summer holidays.

### Atari 400/800

- 1 Defender (Atari)
- 2 Pacman (Atari)
- 3 Galaxians (Atari)
- 4 Star Raiders (Atari)
- 5 Zaxxon (Caltis)
- 6 Contipede (Atari)
- 7 Miner 2049'er (TigerVision)
- 8 Missile Commander (Atari)
- 9 Choplitter (Creative Software)
- 10 Qix (Atari)

### ZX-81

- 1 Flight Simulation (Psion)
- 2 3D Defender
- 3 Mazogs (Bug-Byte)
- 4 QS Galaxians/Gloops (Quicksilver)
- 5 Space Raiders (Psion)
- 6 Thro the Wall/Scramble (Psion)
- 7 3D Monster Maze (J. K. Greye)
- 8 Gulpman II (Campbell)
- 9 Gobblerman (Artic)
- 10 Chess (Psion)

## JUMBO AND SUBMARINE

Dear Sir

I would like to point out that our program Jumbo Jet Pilot, currently available for the Atari 400 and 800, is not being developed for, and shall not be available for, any other computer.

Submarine Commander is currently under development for the Commodore Vic-20 and is being considered for development for the Texas Instruments 99/4A. No release date has yet been set for either program.

Mike Dixon,  
UK Sales Manager,  
Home Computer Software,  
Thorn-EMI,  
London.

## RETURN OF KRAZY KONG!

Dear Sir,

A friend of mine consulted me about a game program from your magazine for the Pet called Krazy Kong (February 1983 issue) as it would not work.

Apart from typing errors, the main cause was that it was written for a 9 inch screen Pet and used a PEEK to find the value of key pressed (PEEK 151). Unfortunately, 12 inch screen 4000 series Pets give different values to the earlier small screen, a fact not widely known.

To convert the program to be universal (on all except the Basic 2 version machines) it is necessary to change the following lines in the program.

Line 80: Replace with lines 15 to 25  
Line 170 to 240: Change variable S to S1  
Lines 1050 to 1090: To use variables Z1, Z2, Z3 & Z4  
Lines 1230 and 1230: Change variable S to S1

With these amendments, the program will run on most Pets... an excellent game in my opinion. If anyone wants to check the value for any key pressed, the following program will show them.

1 A = PEEK (151) . PRINT A  
2 GO TO 1

### Amendments

Line 15: K = 41: P = 40: H = 39: REM FOR CURSOR  
Line 18: REM 9 INCH  
SCREEN VARIABLES  
Line 22: REM 12 INCH  
SCREEN VARIABLES  
Line 28: IF PEEK (57344) = 76 THEN S = S2 Z156 Z2 = -50:  
Z3 = 62 Z4 = 60 Z5 = 54

Line 1050:  
IFA = 21 THEN IFFPEEK(J - P) ...  
Line 1060:  
IFA = 23 AND A1 ...  
Line 1080:  
IFA = 23 THEN GOSUB 500  
Line 1090:  
IFA = 24 THEN GOSUB 600  
John Bloore,  
Kingswinford,  
West Midlands.

## ROCKFALL DODGES!

Dear Sir,

There are two reasons why readers may have difficulty in getting Rockfall printed in your March 1983 issue, to work. First, the printer used to obtain the listing appears to have a different character set to the one on the BBC.

Thus, of course, has the effect that certain BBC characters are replaced by certain non-BBC characters on the listing.

This effect occurs on the following lines  
LINE 10, "I" SHOULD BE "I"  
(WHICH IS DISPLAYED AS "I" - IN MODE 7)  
LINE 10, "I" SHOULD BE "I"  
(I" IN MODE 7)  
LINE 60, "I" SHOULD BE "I"  
(I" IN MODE 7)

Secondly, the program does not work on an Operating System 1.2 machine due to the method

it uses to read the keyboard. Corrections should be made as follows:

530 Z% = Y% + X% A% = INKEY (-26) - INKEY (-122)  
600 M% = A% : C% = Z%  
X% = X% + A% : IF X% < 0  
X% = 0

It would also be a good idea to replace "OPT0" on line 10 with "OPT".

David Mc Kieran,  
Sunderland,  
Tyne & Wear.

## WHERE CAN I TURN TO?

Dear Sir,

I am keen to learn more about my Oric computer but do not know who to turn to as I am new to computing. Can you please advise me whether any groups or any other organisations for Oric users that I can turn to for help exist at the moment?  
Julian Douglas,  
Hartsholme,  
Lincob.

Editor's reply: The Tangerine Users Group (TUG for short) is offering its services to Oric owners and the organisation can be contacted at: 1, Marlborough Drive, Worle, Avon BS22 0DQ.

But Bob Green of TUG tells me he is currently overwhelmed with responses from Oric owners and delays of 14 days before the organisation can get back to enquirers, are inevitable.

## COLOURFUL SKYSCRAPER

Dear Sir,

I have a few modifications to suggest that will introduce a dash of colour to the Skyscraper program printed in April's C&VG. For example, the following changes will give, a yellow plane, a red bomb, black

background and blue skyscrapers.

30 FOR K = 0 TO  
RND(12): POKE J,  
K\*32,175:  
NEXT NEXT-REM  
SKYSCRAPER COLOUR

40 PLS =  
CHRS(158)+CHRS(155)+  
CHRS(146):REM PLANE  
COLOUR

50 NPS =  
STRINGS(3,CHRS(128))  
:P0 = 32:  
BOS =  
CHRS(177) RA = 5:SC = 0  
REM BOMB COLOUR

80 IF PEEK (PO+1026) = 175 THEN CLS PRINT @ 150,  
"SPLAT": PRINT "YOU CRASHED INTO A SKYSCRAPER": PRINT "YOUR SCORE WAS:" SC:  
GOSUB 2500: PRINT "DO YOU WANT ANOTHER GO?" : INPUT US IF LEFT(US,1) = "Y" THEN 5 ELSE END:  
REM DETECTS SKYSCRAPER COLOUR WHEN CRASH OCCURS

1000 IF SP + 32 479 THEN BD = 0:POKE SP + 1024,128:  
RETURN ELSE IF PEEK (SP+32+1024) = 175 THEN  
POKE SP + 32 + 1024,128: (Rest of line as printed): REM DETECTS WHEN BOMB HITS SKYSCRAPER

The colours can be changed to any of the eight colours available, simply by adding the appropriate CHRS codes, listed on page 138 of the user manual, to the values given in the, all green, original version printed in your magazine.  
E. U. Lovesay,  
Norwich,  
Norfolk.

# MAILBAG

## FEMALE FAN MIXES IT!

Dear Sir,  
I would like to say a word of appreciation for your magazine. We have had Texas TI99/4a for around four months

Yours is the only magazine which regularly has listings and adverts for our super fantastic machine. The machine is great — wonderful keyboard, excellent display, clear sound, enormous ROM (Edut Mode is super!)

For other Texas TI 99/4a fanatics here is a colour mixing program discovered by Ian Ellis, aged 10, a friend of my son's:

100 CALL CLEAR  
110 CALL SCREEN (16)  
120 INPUT "FIRST COLOUR":A  
130 INPUT "SECOND COLOUR":B  
140 CALL COLOUR (A,B)  
150 CALL CHAR  
(97,"55A55A55A55A55")  
160 CALL HCAR (1,1,97,768)  
170 GOTO 170

It gives an apparently unlimited number of shades and colours.

By the way — are there any other female computer fans out there?

Hazel Perkins,  
Adel,  
Leeds.

## PLUGGING A NEW MACHINE

Dear Sir,  
Please could you tell me the price of the new Colecovision you have mentioned in your magazine, and when it will be available. I have an Intellivision games machine and was wondering if I could put Intellivision games onto the Colecovision or vice-versa. I have also read in your magazine about a module which plugs into the Colecovision and allows it to take Atari games — will I be able to fit this module to my Intellivision?

Paul Hanks,  
Stroud,  
Gloucestershire.

Editor's reply: The Colecovision will be on sale at most major high street

stores, electrical chain stores, such as Rumbelows, Greens, Dixons, and Boots, in May. The basic unit, which includes joysticks and a copy of the Donkey Kong cartridge, will sell for £149.99. The Atari adaptor, which enables you to play VCS games on the Colecovision will be available at a slightly later date and will retail at £55. No Intellivision adaptors are available yet.

## HIGH SCORE FOR PENGU

Dear Sir,  
In the February issue you gave a good description of Pengo. Which was great because my local newspaper had just installed the game.

Now in the March issue some idiot called "Terry Pratt" has a high score of 17,410. Seeing that I thought that my high score is slightly better. It stands at 374,950. I had to clear 45 screens of snow-bees.

If there is any chance that my high score is the record could you send me a reply, so I could show my friends who have high scores on machines but they don't think its worth writing because they never get a reply.

Martin Stone,  
Chalfont St Peter,  
Buckinghamshire.  
Editor's reply: This "idiot" realised his score wouldn't stand for long — but thought it might set a target for other Pengo freaks to aim at Martin.

Please tell your friends to use their top scores by entering our 1983 Video Games Championships. See page 10 of this issue.

## HOTLINE FOR PET

Dear Sir,  
We are starting a Pet Monthly newsletter service.

It will contain programming hints and tips plus information regarding copyright, submission to periodicals/publishers, etc., technical information for hardware circuitry plus program listings, plus a "hotline" telephone service. Annual subscription is £7 and should be sent to the address below.

Aquarius Software,  
10 Kenneth Road,  
Pitsea,  
Basildon,  
Essex.

## DOGFIGHTER CONVERSION

Dear Sir,  
I tried to enter the Vic-20 Dogfight program featured in your December '82 issue into my school's Vic. My school has the Vic 1211A Hi-Res super expander but no joysticks. Listed below are the conversions needed to run the program without joysticks.

The following lines should be changed:

40 GET \$S  
45 IF \$S="r" THEN COSUB \$SS  
45 IF \$S THEN X=X.Y=Y  
50 IF \$S="S" THEN B=1  
60 IF \$S="A" THEN B=2  
67 IF \$S="W" THEN B=3  
70 IF \$S="X" THEN B=4

These conversions give the following controls:

Dive=W, Climb=X, Left=A, Right=S, Fire=Space bar.  
Kevin Hall,  
Hull,  
N. Humberside.

## SLOW DOWN DRAGON!

Dear Sir,  
I typed in, the 'Dragon Run' listing in your April '83 issue, which worked perfectly. Try adding these few extra lines. They will slow the game down if you think it's too fast!  
31 ? CHR\$(128)  
32 ?? "ALSO, PLEASE ENTER SKILL LEVEL"  
33 ? "(1=hard, 9=easy)";

INPUT WW  
34 TE = 10\*WW

And change the beginning of line 130 to:  
130 FOR I=1 TO TE (the rest of the line remains the same).

I am glad to hear that the Atari range of computers have gone down in price again. The 400 may still not be the best value, but for the little extra money you get some of the best sounds and graphics of any home micro. A look at a few of the new game cartridges, like Defender, will prove me right.

I would like to send a message to all Atari owners — to get the most from their machine, they should join an owners club, and if there isn't a local one, be adventurous enough to start one.  
Edward Tilsley,  
Eastcote,  
Middlesex.

## THE PLANET OF DEATH

Dear Sir,  
I felt compelled to write after playing my first ever adventure. I need help!

What do I need the slimy gloves for? Why is the green man so unfriendly? What does the dance music mean? Why won't the computer — down the pit, behind the wund tunnel — talk to me?

These are just some of the many questions arising after having entered Artic's 48K Planet of Death for the ZX Spectrum. The story so far

I found myself on a mountain plateau, with only a piece of sharp stick for company. I pick it up, and move into a damp limestone cave with a picture of a man climbing down a pit using a rope.

Moving on, I finally collect rope, a pair of boots, a broken floorboard, a laser gun and some stones.

Making my way to the bottom of the pit, I find the green man. I shake his hand, and he throttles me. Oh no not again!

Sometime later I arrive once more at the side of the green man who sleeps on the mirror. This time I shoot him and he goes up in a puff of smoke leaving behind him a broken mirror. I pick the

## SCORES START TO MOUNT

The high arcade scores of would-be champions are beginning to mount in the Computer & Video Games office.

A whole host of machines are proving their popularity but few clear leaders have so far emerged. Many players have stayed with tried and true favourites which have been languishing in arcades for years while others proudly sign their name beside the latest games on the market.

Asteroids, Pacman and Scramble feature among the older games still finding favour with video gamers. James Thomas of Fishguard has taken an early lead with his signed Scramble score of 3,672,820 from the Cleddau Leisure Centre in Haverford West. But the rest of the Scramble scores are languishing well behind.

Jonathan Rees must be suffering from a bad case of Pacman finger

## BE A CHAMP

A brand spanking new arcade game, not previously released in the UK is still to be claimed from Tastel Electronics.

The prize will go to our 1983 Video Games Champion when he has seen off all opposition at the grand final on July 7th.

To qualify for that final, simply cut out the form below and take it down to your local pub or arcade or wherever your favourite machines can be found.

Put up the best score you can on the machine and when you reach a

score you're happy with, ask the arcade or pub manager to sign the form to witness it. You can repeat this process on any two other machines which you fancy your chances on, or purely send the form off to us at C&VG in an envelope marked: 1983 Video Games Championships, Computer & Video Games, Durrant House, 8 Herbal Hill, London EC1R 5JB.

If you mess up this form write or phone and we'll send you another one. You can enter as many times as you like before the June 23rd closing date but don't leave it too late as the vagaries of the post may mean your scores arrive too late.

after achieving over two million at the Carousel Amusements in Southampton. Another two million plus score was notched up by Andrew Freeman of Pitsea Pool in Basildon on Asteroids.

Donkey Kong and Robotron are among the games being battled over by other arcade veterans. Some 569,000 from Mark Neale was witnessed in the Boscombe Pier

Amusements on Donkey Kong while current top Robotron ace is R. Cooper whose score of over nine million stirred the locals in the De-Luxe arcade in Hastings.

Among the recent games vying for position are: Amudar and the popular Mr Do plus my own favourite, Pengo but I won't be featuring in the final after seeing the latest scores on that.

# CONTEST COMPETITION COMPETITION CONTEST

The three best scorers on each of the most popular machines will be given expenses paid trip to London to take part in the final against one another and a star personality.

Please ensure your entries are witnessed by the arcade manager or operator so we can verify the scores. And be prepared to keep July 7th free if you're particularly proud of your top scores.

If your arcade or pub owner is displaying a 1983 Video Games Championships poster he will also have a dispenser of application forms for you to enter on, should you be reluctant to cut this form out of your copy.

## HELP BUYERS MAKE THE RIGHT CHOICE

When you bought your computer did you go for the one with the impressive pattern display or the one conducting its own sales patter.

Well, Atari is giving you a chance to influence the way its computer is presented in the future.

In conjunction with the high street electronics chain of Dixons and ourselves, Atari is setting up a competition to get your ideas on how its computers can best be presented to the perusing public.

Dixons provides a good example of how high street stores have taken home computers to their hearts. The Dixons shelves are now packed with many different brands battling for attention and giving buyers a chance to run their hands over a host of different keyboards.

But trying out a quick loop can hardly be a buyer's benchmark. He should see the micro running at its best before he makes his judgement. Obviously Alan is confident about their machine but how would you show it in its best light?

An Atari 800 microcomputer goes to the winner, or — if you already own an Atari — you can opt for a disc drive and an equivalent value in Atari software as a prize.

To enter the competition, simply write a program in Atari Basic which sets the computer off to the

## Confessions of a Bug

Dear all,

Only one thing to come clean on this issue. For all you T.I. 89-ers who couldn't pass our colour blindness test on Ski-ing in May, I've got to warn you about the perils of snow glare.

Any irate phonecall or a letter to the offices of C&VC will result in a

best advantage. Making the best use of the colour graphics and sound facilities of the machine.

The best of the programs will hopefully feature in future Dixons store demonstrations, helping to entice people to buy Atari computers.

There will also be three runners-up prizes of the latest Atari software.

purely black and white listing being returned to you in the post.

The editor assures me that hands have been chopped off and the people responsible have been assigned to work on the Seventh Empire.

Meanwhile here are some corrections:

300 FOR M=A TO B  
730 IF (C=70) + (C=73)

2230 CALL HCHAR (24, 1, 32, 32)  
2250 CALL HCHAR (XX, Y, 9, 120)  
Yours Mal.

Judging will commence on June 16th and we'll need your entries in by then.

My own view of in-store displays of microcomputers is that they are on the side of the technical and verbose, instead of getting down to demonstrating some hot game action. But, luckily, it is being judged by Dixons' and Atari's experts, so you'll have a free reign to produce the best display for all kinds of computer usage.

The competition is not open to employees of EMAP, Dixons or Atari or their relatives and the judges' decision will, of course, be final.

## SEVENTH CHANCE TO ENTER

The reappearance of The Seventh Empire has been met with roars of approval from the players and groans of horror from the poor devils who are tied to the Empire computer while it decides the fate of the galaxy.

But with a Colecovision as the star prize in the game, we couldn't let the game suffer its demise for too long. So it will soon be making a triumphant return — allowing a fresh start to all those who may have lost a fleet.

We can now replace players who have had to drop out of the game for one reason or another. So if you have been disappointed in the past, not to be playing Seventh Empire, then we are offering another chance.

First come, first served. I'm afraid

but fill in the form below and we will do our best to include you.

Please include me in the Seventh Empire game when it resumes

I would like to name my tribe the

## NEWS

from SPECTRUM

### BBC

Now from SPECTRUM the outstanding BBC 'B' machine plus, Disk Drives & software see ad opposite for details

### PRESTEL

See PRESTEL Page 600181 for up to date information from SPECTRUM

### VISCOUNT DISK DRIVES

Coming soon! A fabulous new range of Disk Drives specially selected by SPECTRUM from under £200 (not suitable for most micros inc. LYNX, CGL, GENE, DRAGON etc. Ask your local SPECTRUM dealer for further details)

### NEW SPECTRUM MEMBERS

Check our address page! There are many new SPECTRUM dealers throughout the UK so there's a good chance there'll be a SPECTRUM centre near you

### INTRODUCING SPECTRUM FACTS!

Next to many of our offers you'll find a few extra tagged SPECTRUM FACTS. We pride ourselves on providing you, the customer, with a genuine service as well as a great price, and we want you to know that when you buy from a SPECTRUM dealer you'll get exactly the right micro for your needs. SO LOOK OUT FOR YOUR SPECTRUM FACTS!

### AFTER SALES CARE

SPECTRUM service centres will ensure that should your machine go down we will get it running again as quickly as possible. We also offer extended warranties at very competitive prices too! Ask your SPECTRUM HOME COMPUTER CENTRE for full details

### COMPUTER DEALERS

The SPECTRUM dealer list is usually placed at the end of our magazine. It gives the name, address and telephone of the nearest SPECTRUM dealer to you. For more information, write to: SPECTRUM, Spectrum House, 1st Floor, 100, Broad Street, Birmingham B1 2HT.

## BBC Model 'B' MICRO

|                             |         |
|-----------------------------|---------|
| BBC 'B' with Disk Interface | £470.50 |
| BBC Disk Interface Kit      | £95.00  |
| BBC Single Disk Drive 100K  | £295.00 |
| BBC Dual Disk Drive 300K    | £303.85 |
| BBC Tape Recorder           | £29.00  |
| BBC Ascom Software Cassette | £9.95   |
| BBC Disk based software     | £11.50  |

Yes, this top selling Micro system is now available from your local SPECTRUM dealer. The BBC Model B, offering 32K RAM, plus a full backup of peripherals & software, too! It's an infinitely expandable machine ideal for the home or business and is already widely used for educational purposes in schools, so the chances are your children may already be well familiar with its operation, which must make it the ideal choice for the home too. So if you're thinking of buying a micro you must take a look at the BBC at your local SPECTRUM dealer NOW! But just one word of warning: initial stocks will be limited and demand is bound to be great, so please phone to check the stock position before making a journey.

### Spectrum Price

## DISCOVER THE HIDDEN KEY TO TREASURE

### PHARAOH'S TOMB

Travel back in time to ancient Egypt and explore Pharaoh's Tomb. This is the opportunity afforded to Vic owners in the latest game from Amiga Computers.

In order to get into the inner chamber of the tomb you will need to find the four hidden parts of the key. To assist you in your travels you will also have to collect other items such as an axe, a spade and apple and a lamp.

Pharaoh's Tomb runs on the 16k machine and is available from Surrey based Amiga at £6.00.

Two other new games from Amiga this month for the Vic 20 are a version of the arcade game Donkey Kong called Krazy Kong, and a space shoot out — Xenon — both requiring a 16k expansion and both will sell at the slightly dearer price of £7.90.

## HUNT THE WIZARD'S TREASURE

### KNIGHT'S QUEST

The Knight's Quest is to find Merlin's treasure and take it safely back to the castle.

This part text and part graphic adventure divides the screen in two with a screen for pictures in the top half and scrolling text in the bottom.

In order to find Merlin's gold nuggets, jewels, Magic Ring and Seeing Mask you will have to explore 120 rooms.

On your journey you will have to battle elves, scorpions and dragons, rescue a beautiful princess from the Wizard of Trill, visit the Witches' Tower and the Valley of the Seven Rocks, and journey underground into secret chambers, which can fill with water and drown you.

The game also features a reincarnation routine which can be useful if you get on the wrong end of an elves spear or a Wizard's spell.

Also useful is a Save Lund which enables you to stop the game at a certain point and take up where you left off a few hours or days later.

The Knight's Quest is available from Surrey based Phipps Associates at £5.95 for the

Spectrum version in 48k and £4.95 for the ZX81 version in 16k.

## THE DEMONS INVADE ENGLAND

### DEMON ATTACK

America's top selling video game of 1982 is now available in home computer format in the UK.

Imagic's Demon Attack, the shoot 'em up game with no less than 84 waves of exquisitely drawn aliens has been converted for use on the Atari 400/800 and the Vic-20.

The game has been so popular in the US that its designer, Rob Fulep, recently received the award of designer of the year.

The game is imported into the UK by Hales of Yorkshire and costs £29.00. The Atari version is available now and the Vic 20 version will be in the shops in June.

Another well known Imagic video game — Atlantis, an underwater battle — is also in the process of conversion for the Vic and the Atari home computers.

The next large video games manufacturer to follow in Imagic's footsteps is likely to be Parker Brothers of Empire Strikes Back and Frogger fame who have lined up some of their games for a July launch on home computers.

## MY, WHAT A NICE GAME YOU'VE GOT

### WOLF TRACKS

A villainous wolf haunts the wood in a new computer game idea based around the fairy tale, Little Red Riding Hood.

The game is unique to the Colour Genie computer and wields the elements of the children's story into a tactical game which Genie manufacturers, Lowe Computers, hope will have several spin offs.

The first version, Wolf Tracks, features Little Red Riding Hood picking primroses in the wood and gradually filling her basket, unaware of the lurking wolf. She must avoid spilling primroses and bumping into trees and the poor girl is occasionally drive

bombed by aggressive birds.

When a basket is filled it should be taken to granny's house and the primroses used to fill vases on the windowsills of the cottage.

The real danger in the wood is the wolf. He leaves his tracks in a trail of red primroses which our heroine crosses at her peril as the wolf will attack her if she does.

The games also features a woodcutter, who can be called upon to bring his hatchet and try to destroy the wolf. But as time marches on in the wood the march of the red primroses continues leaving even more of the screen impassable.

The Genie's analogue to digital joystick, which increases the player's speed, the further it is pushed in any direction, plays an important part in Wolf Tracks.

It will retail at around £5.6 although a final price had not been decided on as we went to press. The game is available through the Colour Genie Users Club at 46 Highbury Avenue, Bullwell, Nottinghamshire or through local enthusiasts in Madock.

Other versions of the game are currently being planned.

## HORRORS FROM THE HEAVENS!

### TERROR-DAXTL

As the sun sets your blood runs cold as an unspeakable horror pours out of the heavens. Sweeping monsters after your flesh. Bird-like and scaly. Creatures not of this world.

Aimed only with a bettered pistol you will need all your skill as marksman as night falls. Darkness follows shortly but still the monsters come. Then eyes shining out brightly like distant twinkling stars.

Terror-Daxtl 4D is the latest 48k game from Melbourne House software — the people who brought you the Hobbit and Penabalo.

The games fourth dimension mentioned in the title refers to the fourth dimension of time which is incorporated in the game in the shape of the setting sun. The game is available from W. H. Smith at £5.95.

## GET ALL TIED UP IN KNOTS

### KNOT 3D

The Games News team was managed to sneak a preview of the latest game from New Generation Software — the one man software house of 3D Tunnel fame.

Called Knot 3D the game offers a totally original scenario. An Xris positioned at the centre of the screen and appears to move into the screen as walls and shapes loom in front of you.

In the words of the game's designer, Malcolm Evans, the idea of the game, "is to avoid collisions with your own green/yellow trail, and those of up to four chessies, as you inch through an empty three dimensional space."

As more trails are laid it becomes increasingly difficult to thread your way through the knots created.

The game will be available at W H Smith at the end of June. It will run on the Sinclair Spectrum in 16 or 48k and will sell for £5.95.

## CALLING ALL VORCON WARRIORS!

### VORCON WARS

Here's a game which reflects your personality in the way you play it.

The planet Vorcon is open for plunder. Ruthless people will risk all in an attempted attack on Vorcon. More cautious players will cultivate land to feed their people or spend their resources on drilling for oil.

Vorcon Wars is a brand new play by mail game. The ultimate aim is to become a nuclear power. Towards this end you will have to plan projects such as the construction and launch of a satellite for surveillance and to aid in the transportation of men.

Vorcon Wars is the invention of John Nicholson of Blacknell, Berkshire. Each turn costs £1 plus a further £1.50 for the first three maps and the book of rules.

The C&VG Games News team have entered Vorcon Wars and will be keeping you up to date on happenings on the planet.

Each player receives from the organisation two computer printouts. The first of these show the immediate territory around your home base. The various land uses are represented by hexagons, for industrial, agricultural, weaponry.

The second printout gives you a detailed printout of how your resources were used in the previous go with your current status in all areas.

## TREASURE HUNT FOR A CHAMPION

### ROMIK CHALLENGE

Big cash prizes are being offered by Romik software to players who achieve good high scores while playing some of their new games.

The offer is part of the firm's search for a world champion Romik games player.

Each new cassette contains a yellow entry form for the Grand Master competition. As well as the cash prize the winner will receive one copy of each new Romik game for one year.

New games this month from the Slough-based firm are Time Destroyers — a scrolling shoot up with a variety of aliens to be blasted. Destroyers is Romik's second space game for the expanded Vic and required 3, 8, or 16k Ram expansion.

Unexpanded Vic owners have also been included in this month's new release — Space Fortress is based on the popular arcade game — Phoenix Powerblaster is a maze chase game with a shoot 'em up space theme.

Romik have also branched out into two other computers with the launch of their first game for the ZX81 and the BBC machine.

Super Nme is a selection of nine games on one cassette for the 1k ZX81. BBC owners are given Birds of Prey — a shoot up with bird-like aliens.

Romik's Vic games are available from Lasky's and other computer shops at £3.95. Prices have yet to be confirmed on the BBC and ZX81 games.

## THE CHICKENS COME HOME TO ROOST!

### CHICKEN

What goes cluck, cluck splat? A chicken trying to get across a busy motorway of course!

If you want the chicken to survive then you'll need considerable skill and the latest cassette from the new Vic 20 software house Micro Antics.

Chicken Challenge is based on the arcade game Frogger. You must get five chickens safely across the road in as short a time as possible.

Just one thing you should know. This is no ordinary motorway. Along with the lorries and cars you will also see Diving Ducks and chicken pies on the conveyor belts, and a thieving fox.

Also new from Micro Antics this month is a children's game. The game is called Brain Panic and, like Chicken Challenge, is for the unexpanded Vic. In it you have to match up trains, animals and other objects. Brain Panic is based on a children's card game.

Both games are available now from Micro Antics of Staffordshire at £5.90.

## TALK ME THROUGH THIS ONE!

### PARSEC

Good shot plot: croons the female voice of your ships battle computer as you hurtle through space, gazing your eyes from the blinding flashes of light as your laser fire blasts the aliens.

Two light years further and she speaks again, "Time to refuel!" This is a tricky exercise as you must fly your craft through a narrow tunnel. But take heart. Your electronic companion is quick to congratulate you if you successfully complete the exercise.

Parsec is one of two new games from Texas Instruments for the TI 99/4e incorporating their add-on speech synthesiser.

You are at the controls of a space ship scrolling from left to

right against a background of stars. But don't let your one directional movement lead you into the mistaken belief that the aliens will conveniently attack from one direction as they won't. They will come at you from behind as well as from the front.

There are sixteen different types of aliens to be destroyed all capable of unique attack strategies.

The second new talking games called Alpher and features a far wider vocabulary than Parsec.

You play the part of the intruder mountaineer, bravely clambering over the slippery slopes, falling boulders, biting snakes, avoiding fires, and even an eagle which attempts to bomb you with a giant golden egg.

Your commentator is always ready with a cutting remark when you make a false move. "Did you mean to do that?" she sarcastically enquired when I tumbled to the ground after being hit by a falling boulder.

It is difficult to reel making mistakes on purpose in Alpher just to see what will be said next!

Alpher and Parsec are available from your Texas dealer now at £31.95. The speech synthesiser is available at £49.95.

# NEW PRODUCTS NEW PRODUCTS NEW PRODUCT GAMES NEWS

## BACK TO THE BATTLE OF BRITAIN

### SKYHAWK

The scene is a sloping village set among the hills in the heart of the English countryside. The date is 1943 — the height of World War II and the Battle of Britain.

Suddenly, the tranquility of a hot summer day is broken by the roar of German aircraft engines flying in low to dodge constant radar.

The lives of many people depend on you — a lone fighter pilot leading a squadron of enemy aircraft. This latest game from Quicksilver, called Skyhawk, for the Vic-20 puts you in the hot seat — defending your homeland from a deadly attack. Keep a careful eye on your fuel supply. You may have to land to refuel during the battle.

Skyhawk runs on the Vic with 3k or 8k expansion and is the second game from Quicksilver for the Vic. It is available now from the Southampton-based firm at £7.95.

Spectrum owners have not been left out of this month's new releases with two new arcade style games.

Astroblast is a multi-wave shoot 'em up with an assortment of tough aliens. Frenzy is a robot attack game in which you must fight it out with deadly dioids. Both games run on 16k or 48k machines and are available from HQ at £4.95 each.

## STOCKS AND SHARES ON THE MARKET

### STOCK EXCHANGE

New software house ASL are understandably bullish about their new game for the Oric.

This game is called Stock Exchange and enables you to dabble with stocks and shares for the afternoon without causing your bank manager to burst a blood vessel!

The game displays the continuously updated performances of nine companies. You must buy

and sell shares to make money. Borrowing is allowed but not always advisable.

On the B side of Stock Exchange is a bonus program called Etch-a-Sketch which features a movable cursor, shading in any colour which you can select from the list on offer.

Stock Market and Etch-a-Sketch are available from the Wrexham based firm at £4.

## THEATRE OF DEATH AND DESTRUCTION

### SHEVA

Building Masterminds reading this will not need to be told that Sheva is the Hindu god of destruction.

The less well informed amongst you may also be interested to learn that Sheva is the name of the latest game from Red Shift Software which simulates the conflict involved in Europe during World War III.

The game features a scrolling map of Europe. The cities which you have chosen at the beginning of the game may be annihilated by nuclear warheads if you are not careful.

Sheva is the follow up to Red Shift's Timalords — a complex computer-cum-boardgame for the BBC model B, at £7.95.

Sheva runs on the 48k Spectrum and is available from the London based Red Shift at around the £7 mark.

## JACK JUMPS JUST LIKE A FROGGER!

### JUMPIN' JACK

Jumpin' Jack Flash he's a gas, gas, gas. Well — more precisely, he's a brand new Frogger type game for the unexpended Vic-20.

Hopping from log to log, and then on to turtles, you must jump your little green lizard across a fast flowing river.

Jumpin' Jack is just one of a wide range of games which have just been released for the Vic-20 from Sunlock.

In this month's batch is a Galaxians-type game called Tred and a version of Scramble. All three games run on the unexpended machine and are available at £7.95.

Also new from Sunlock this month for Vic owners is an adventure game requiring a 16k expansion.

Starship Escape challenges you to find the various bits of your spacecraft which have been hidden by aliens in their giant spaceship. Starship is available at £9.95.

## THE BIRDS FLY HIGH WITH VIC FIREBIRDS

### FIREBIRDS

Cosmic Firebirds — the arcade game with the spiralling alien — has at last been converted for the Vic 20.

Firebirds is the latest offering from the new software house — Solar Software.

Other games in the range so far include Tred and Tred's lemurites — Galaxians, Scramble, Super Breakout, Gunlight, Asteroids and Munchman.

The games are available from Curry's Micro C and direct from Solar Software at £5.95 for Gunlight, Asteroids, and Munchman, and £6.95 for Galaxians, Scramble and Super Breakout.

All of the games run on the unexpended Vic except Cosmic Firebirds which runs on the Vic with an 8 or 16k expansion.

## TUNE IN TO THOSE NEW MICRO WAVES RADIO PROGRAMS

Home computer owners in the West Country can now tune into a free bank of software on their local commercial radio station — Radio West.

C&VG spoke to Zorte, real name Edwin Tozer, Radio West's computer program presenter. "The program goes on on Monday evenings between 7.30 and 8.00 pm. We cover computer news, run competitions, and broadcast short computer programs — usually no more than about fifteen seconds in length."

Subjects covered so far have been multiplication, morse code, and a graphics package for the ZX81 which was programmed to draw a picture of a laco.

No games have been broadcast as yet but Zorte is working on a Breakout type game for the BBC machine, and soon Radio West will be ready to broadcast their first game.

As well as the short programs broadcast during the programme Radio West also broadcast longer programs after the station has finished normal transmission.

These longer programs have been mainly educational, with some business applications. Machines for which software has so far been broadcast are the Oregon, ZX81, BBC, Epsom, Newbrian, Atari and the Oric.

# A feast for everyone interested in computers.

We're preparing a mouth-watering spread for our 4th International Computer Show at the Cunard Hotel, Hammersmith.

Over 120 exhibitors from all over the world will be there.

Which makes this Show the biggest ever mounted in Britain by one computer manufacturer.

## £3,000 WORTH OF EQUIPMENT TO BE WON

There's also £1000 worth of computer systems to be won every day at the Show.

## COVER CHARGE

Admission to the Show costs only £1. Family tickets are also available for just £2.50.

And isn't that a small price to pay for a feast like this?

## THE DRAGON SPREADS ITS' WINGS!

### FLIGHT SIMULATION

Up, up and away go Dragon owners with a flight simulation written by a professional pilot.

The game challenges you to safely take off and land a small plane. You have all normal flight controls including an instrument landing system and vertical speed indicator.

Flight Simulator runs on a Dragon in 16k and is available from Salamander Software of Brighton at £3.95.

## DAMSELS IN DISTRESS NEED HELP!

### WIZARD

Wizard takes you back to a fantasy land of spells, demons and beautiful maidens with flowing golden locks.

But if you think this is a lousy tale adventure game you would be wrong. Wizard is an arcade style game with a few original twists of its own.

The demons are attacking your planet — swooping down and abducting the maidens who are helpless against their superior strength.

Your job is to save them before they are brought back to the evil king who will put them to death in a ceremonial sacrifice.

Several waves of demons must be dealt with — together with cunning little bugs who come at you intent on destruction.

Wizard runs on the BBC model B in 32k and is the latest game from Quicksilver at £6.95.

Also new for BBC model B owners is a monster attack game called Proclator. The monsters are attacking scientific installations in an isolated part of your planet. The game gets faster and faster as you drive your craft from base to base, blasting the invaders. Watch out also for the occasional monster which grows larger as the game progresses.

The third Beab offering from Quicksilver this month is a boxed Music Processor which enables you to exploit the musical capabilities of the BBC A or B.

The Music Processor costs £14.95, you get a 30-page instruction manual included in the price. Quicksilver's original customers — Botani's one million plus ZX81 owners have not been left out of this month's new releases.

Four new games are on offer for the 16k machine. Ocean Trader is a seafaring simulation enabling you to play captain of the ship, Pioneer Trail takes you back to the wild west, and Black Star is 3D shoot 'em up. For arcade addicts there are also versions of Amidar, and Pacman.

## WORDS OF WISDOM, AND GAMES!

### TEXAS BOOK

Texas owners can look forward to 35 new games to enter into their software starved computer when a new book goes on sale later this month.

The Texas Program Book contains 35 listings which you can enter into your machine. The subjects covered include games, home accounts, and a filing system.

Games highlights are 3D-Meze, horse racing, tennis, and a novel game in which you help a penguin to save its eggs.

The book will be available from Phoenix Publishing Associates at £5.95.

## THE GAMES CAPITAL OF THE U.K.?

### LYVERSOF

Liverpool is fast becoming the Silicon Valley of the UK for computer games anyway.

The city that gave you Bng Byte and Imagine can now boast a third specialist games software house called Lyversoft.

They have just launched

a range of games for the Vic-20. Apple Bug challenges you to gobble up the life saving apples before the bug catches you. Crazy Climber sets you the equally difficult task of climbing scaffolding and catch balloons floating past to score bonus points.

Space Assault is a Scramble type game with a difference. Instead of bombing fuel-dumps to relieve us in the arcade game you must deck with the fuel-tankers.

Lunar Rescue puts you at the controls of a ship attempting to land on a planet bombarded by a meteor storm. Your task is to pick up the three marooned scientists and make your escape.

The games run on the 3 or 8k Vic-20 and are available from the Liverpool based firm at £5.95.

## FIGHT THE FLAB, NOT MORE ALIENS!

### DIETRON

Calling all overweight Spectrum owners. If you are becoming flabby and hollow-eyed due to many hours crunched over the keyboard then here is a computerised answer to the problem.

Dietron is a new program designed to enable you to plan your diet.

No, you don't stand on your Spectrum to make it speak your weight. Instead the program asks you a number of questions which "will establish a complete range of values and requirements that are personal to you".

Once your values have been calculated you can jot them down and proceed with your diet, or if you have a printer, make a print-out.

Key 1104 on the Dietron show you the complete range of foods for which information is held. For example key 1 will display information 37 varieties of vegetables.

The values can be reset at any time for a second person to receive information. There is also a second program on the tape which is a data bank of nutritional information. Less chips for Spectrum owners from now on!

Dietron runs on a Spectrum in 48k and is available from W. H. Smith at £5.95.

# If you think Pac-Man<sup>\*</sup> is a tough act to follow, meet Ms. Pac-Man<sup>\*</sup>

Make no mistake, this little lady is a screen sensation. More dynamic, more talented than even Pac-Man himself (and he's the world's biggest selling video game ever).

Ms. Pac-Man has just what it takes to be a video star.

Graphics that are close to arcade quality. Four mazes to amaze you. She even hands out bonus points for audience participation. So visit your Atari<sup>®</sup> stockist and meet Ms. Pac-Man in person. She can't wait for you to give her a screen test.

# THE EVOLUTION OF COMPUTER & VIDEO GAMES (PART 1)

BACK ISSUES

Most computer historians agree that the first known remains of Computer & Video Games date from November 1981. It was then that this magazine first emerged (a little unsteadily) into the primeval twilight of the early days of Sinclair Man.

Then huge computer dinosaurs roamed the Earth, thrusting keen young programmers into their wall-to-wall maws and the magazines looked a little out-of-place surviving on a diet of strange new features and listing material washed up from across the Atlantic.

Naturalists are only now beginning to draw conclusions about the close association between the Computer & Video Games story and a little yellow gobbling creature's own evolutionary niche.

Let us take a closer look at some of the noteworthy steps in the evolution of both:-

## November 1981

The strapping emerges into twilight with Tarot on the Tandy, Musical Hangman on the Sharp MZ-80K, Trench on the Atari, Nibblers on the Pet and Super Nim on the Apple. Keith Campbell looked off his popular Adventure series, Garry Marshall looked off graphics with a space invader. There were Pacman arcade tips and Max Bramer looked at the first chess machine, Von Kneipen's Turk.

## December 1981

Growing up fast with Potshot on the Vic-20, Breakout on the Atom, 'Round the Horn' on the Tandy, Mini Golf on the Atari and Pet owners could tackle Rubik's Cube with more confidence. Keith Mott went trouble-shooting on the ZX81 in Kot Kornar and Screaming Fool-up fell in love with Terry Wogan.

## January 1982

A new year begins with Ted Ball on the trail of the Bugs in his Practical Programming column. Speed Race for the Texas, Treasure Hunt was a popular Apple adventure — much converted by owners of other machines, three 1K wonders for the ZX81 and Changing Hearts for Atari owners. We also saw a sexier side to gaming with a feature on Softporn Adventure!

## February 1982

Science Fiction author David Langford brought a new look to space games with Space Blockade. Dr Livingstone set up a quest for Sharp owners and Grand Prix gave Tandy owners a racetrack to try out. David Annal POKED some sounds out of the quarter

macro and Arcade Action announced two Pacman lookalikes.

## March 1982

Robin Bradbeer reported from Las Vegas on a country going video crazy — how right he was. ZX81 owners got to grips with Reversi (Othello), there was Startrek III.4 for the Tandy and Octodraw had the Alan moving in eight directions at once.

## April 1982

Spring came with Tin Metcalle's feature on pinball, a revitalized sector of the arcades fighting back against Space Invaders. Engineer helped Atari owners rebuild the Golden Gate Bridge, Poker for the ZX81 and Kon Potkin's classic Tandy wargame Knoggepel. Plus Pacman hit the home Video Screens at last.

## May 1982

Computer Moderated Games were investigated by Terry Pratt (the first thoughts on Seventh Empire were voiced about here). Minotaur took the Vic-20 down into a maze and tried to lose it, Pacman arrived in a C&VG listing on a Pet. Monopoly for up to five Sharp businessmen, Meteorstorm took Apple owners by surprise and Earthport II won Tandy fans.

## June 1982

The World Cup was upon us and we responded with World Cup Manager — written for the Sharp but without a PEEK or POKE and since converted to many a micro. Vic-20 owners were set afloat on a river torrent in Speedboat, there was Trolls Gold on the Apple and Dog Star Adventure on the Tandy.

It also included issue 1 of our BBC Micro publication, Owl.

## July 1982

Do the arcades have anything to offer the lazier sex? America was wooing women with Ms Pacman and we featured our first lady of the arcades in July. Imhotep took the Apple owners back to ancient Egypt, Moon Shuttle sent the Vic into space and Z-Xtra gave 16 pages over to Sinclair fans.

## August 1982

Haunted House gave Atoma a shudder, Space Hopper made Tandy's jump to it and Rocks made Vic owners roll over and beg for more. Imagic launched a range of car tridges for the Atari VCS. Hardcore was given over to a game-player's guide to the Atari and Sid Garden gave us all a giggle with a computer widow's tale.

## September 1982

Ton, out of the arcades came Walt Disney's graphically curving film about being trapped in a computer game. We featured it first. Pacman appeared on the Vic-20, there was Star Wars on the Atom and Colditz Adventure on the Tandy. Issue two of Owl gave BBC owners Speed Trail and X marks the Spot.

## October 1982

C&VG saw out its first 12 issues with Space Watch on the Spectrum, asking you to befriend the aliens before it's too late! Sharp Defender, Galaxian Colony II on the Apple and the controversial Wild Strawberries on the Atari added to the action. And Pacman appeared in the Bugs cartoon!

## Chameleon Games For SPECTRUM

**KING ARTHUR** A war game in which you really are at war, your strategy has to be right, because if it isn't you will not survive. A wrong decision or an error in judgement could cost you your life or the lives of your army. Eight battles must be fought and won to allow you to fight the battle of Moulton, the battle which unites Britain under one King, but are you that King?

Maps, text and graphics all combine to set the scene in 6th Century Britain.

**BATTLE OF THE BULGE** The Ardennes 1944, the Von Rundstedt offensive. Could you have planned and fought this battle better than in 1944? Movement of armoured divisions and infantry can be a hazardous task in war conditions.

An option within the program allows the use of a ZX printer to produce hard copy maps of troop positions.

**SEAWOLF** An unusual hunt and evade war game. The interior of the submarine contains all the dials and information you need to locate and sink enemy shipping. But you are prone to attack if you spend too much time close to the surface. Then you must dive to evade the chasing destroyers using your instruments and cunning to stay alive. Full graphics and real-time animation.

\* **SPECIAL OFFER** to C&VG Games readers \*

£26.00 each inc.p&p.

\* plus FREE tape for storing data

## Sensory chess computers supreme - Conchess

**CONCHESS** is all you ever dreamed of from a chess computer and more! You don't have to be a Chess Master to get the best out of CONCHESS but we guarantee that CONCHESS will get the best out of you. Why? Because there are ten programmable levels of play all your command and control up to BCF 130 145 Plus.

That's 10 BCF points ahead of its leading rivals and equal to the above average club player. CONCHESS sensory chess is so simple to use that you are only aware of the quality of the game and the skill of your opponent. There are three models to choose from - the avant garde Escorber in silver and black, the Ambassador (illuminated in metal inlaid veneer woods) and the tournament size Monarch in superb rosewood veneers. There are no keyboards, screens, pegs or panels to push down, you simply pick up a piece and move it - the computer internally indicates the move if you wish to make it, it will not allow illegal moves. If you need help it will suggest the best move for you and show you the response it is considering. We believe it to be the finest chess computer available both for learners and experienced players. CONCHESS represents the ultimate in contemporary chess computers and because both hardware and software are upgradeable by changing just a cartridge you may never need to buy another chess computer again! Send for free information, reviews and list of stockists.

**CONCHESS - a move ahead of its time**

## BY ALLAN SCARFF

Go is far more popular in Japan than any comparable game is in the West. Apart from appearing on peak time television, Go is the subject of regular newspaper columns and the national press spend quite large sums of money on sponsoring professional Go tournaments.

In Japan, Tsume-Go takes the place of the daily newspaper crossword puzzle. This type of life and death Go problem can be extremely tricky to solve even though there may be very few moves to consider.

The example shown in figure 1 is about as simple as they come. Black's first move is almost certainly at A3, B3, A4 or B4, but which?

The object is to stop white forming two eyes. If, for instance, white manages to play both at A3 and B3, white's stones can never be reduced to a single liberty and therefore can never be captured.

Figure 2 shows black's most obvious approach which of course fails!

If you wish to get the full flavour of Tsume-Go try to solve the problem without looking at figures 4 and 5. Even though there are only a few possibilities you may soon find that it becomes increasingly difficult to remember which sequences of moves you have already considered and thus what possibilities are left.

This is one element of Go in which the computer can shine. Since the position is entirely isolated, there are no complex interactions to complicate matters. The simple technique of tree-searching will suffice.

Figure 3 shows a small part of the tree of possible sequences. After each move the white stones must be examined for one of three states:

- Dead — there are no longer two or more potential eyes

Figure 1: Black to play and kill white (white's mark potential eyes)

Figure 2: The obvious failure (two eyes are alive)

Figure 3: A small portion of the tree

Figure 4: A less obvious failure (The second eye is achieved after capture of three black stones)

Figure 5: Successful (If white next plays at B4 black captures at A2)

- Alive — there are two or more completely formed eyes
- Maybe either — there are still potentially two eyes not yet fully formed.

In the last case the next move in the sequence must be tried. In the other two cases alternative moves must be examined.

The listing shown gives the main logic needed to search the tree.

We need only consider the intersections within the enclosing black stones. The x and y co-ordinates of these points must be placed in the tryx and tryy arrays prior to calling the tsume procedure. The routine finishes with the result, the first black move, available via the number 1 element of the branch array

For a problem of this size the procedure will examine about 200 sequences averaging under 5 moves each. Since the status of the white stones must be examined after each move, the whole process will take many seconds if not minutes.

Larger, more typical problems can take much longer. It may be possible to speed the search up by eliminating some of the sillier moves, but too heavy pruning of the tree can mean rejecting a move that may look silly but is actually the only move that works!

Now if you've attempted the example (without the aid of a computer), you may appreciate the worth of a thorough Tsume-Go program even if you have to leave it running all night!

```

There is still only a limited library of games software for the Dragon owner. And many have looked longingly at the wealth of Tandy Colour Computer software and wished the two machines were closer than the hair's breath which separates them.

Now they are RON POTKIN has taken time off from his Warpath series to show Dragon owners how they can make use of Colour Computer software on their brand new machines.

If you own a Dragon, you probably know that it is similar to the TRS-80 Colour Computer. The Basic commands are the same and it uses the same machine language. Yet despite this, it is unlikely that a program written for the TRS-80 will run satisfactorily on the Dragon. In this article, I intend to give some help in converting the programs so that they will run.

Unfortunately the PLAY command still defies translation, but I never use it anyway.

Unfortunately, little can be done to ROM packs. The design is such that they cannot be easily be altered to run on the Dragon. We can however, adjust Basic programs. Machine language programs (those which are run using the EXEC command) can also be altered but this can be very difficult. More about this later.

First, let us examine the Basic Interpreter Program. You will know that when you switch on the computer, it wakes up and prints "OK" on the screen. In the fraction of a second an initialisation program, a part of the Basic Interpreter, has been automatically run in order that the computer may be ready to accept and carry out your commands.

This is similar to a calculator which is able to add, subtract, multiply and so on immediately you turn it on.

It is a complex program. There are routines to print on the screen, read the keys you press at the keyboard draw a line, read the tape and many more. Many programmers when writing in machine lan-

## TIME AND SPACE

guage will use these routines in their programs.

It saves time and space and avoids re-inventing the wheel, but it is one of the main reasons for our conversion problem. You must know where these routines lie in memory and the addresses may be different in the two machines.

The Basic Interpreter cannot be erased or changed when you switch the computer off.

any program you have entered will be lost but the Interpreter remains intact, ready to spring into action when you next turn it on.

One function of the Interpreter is to reduce the length of a Basic line. Let me explain what this means. Assume I type in the following line  
10PMODE 4,1:PCLS SCREEN  
1,0

## LISTING GARBAGE

Ignoring the line number and spaces, this has 23 characters but to save space the commands PMODE, PCLS and SCREEN are converted to numbers (or tokens) so that instead of 23 characters only 11 are required to hold the line in memory.

These tokens are not the same in both machines. As a result, if you load a TRS-80 program in this compressed format into the Dragon, the instructions will be mis-read. When you list the program, you may believe that you are listing "garbage", but closer inspection will show that although the Basic commands are different the line numbers and variable are intact.

It is usual to save the program on tape in compressed format because it reduces loading time, but you do have the option of saving in ASCII format. The command is CSAVE "PROGRAM.A".

Saved this way, the words PMODE, PCLS and SCREEN will be saved instead of the tokens. If you save a program on tape in the ASCII format using the TRS-80, you will be able to load it correctly into the Dragon. The Dragon will read the commands and translate them into its own tokens. Try this method if you have access to a TRS-80.

Although we can change the tokens, there is one instruction which may cause difficulties. This is the USR function which is used to access a machine language program from Basic. It is mentioned only very briefly in the Dragon manual.

If Basic passes a number to the program or the program

# DRAGON FROM THE

passes a number back to Basic, two addresses within the Interpreter must be changed in the machine language. These addresses are:

|                         | TRS-80                               | Dragon                    |
|-------------------------|--------------------------------------|---------------------------|
| Get argument from Basic | Decimal 46061<br>Hex B3ED 35632      | Decimal Hex<br>B3ED 35632 |
| Return result to Basic  | Decimal 46324<br>Hex B4F4 35895 8C37 | Hex 8B30                  |

In addition, it may be necessary to check whether routines in the Interpreter have been used. This starts to get complicated and there are no easy rules. You will soon discover that trying to understand a program written in machine code is a challenge. If you are keen, get a disassembler and be prepared for some late nights!

The TRS-80's EDTASM has a good disassembler but you cannot use the tape commands. If you find this difficult

to follow, don't worry; your understanding will improve as you become more accustomed to your Dragon. Just remember that if you do not think you can

convert a TRS-80 program, don't waste your money!

Now let's see how the program can help. It's purpose is to create a machine language program which will convert the TRS-80 Basic tokens to the equivalent for the Dragon. It will leave unchanged anything contained within strings, so that any machine language routines or graphics will be safe. The program syntax is not checked.

All lines within the TRS-80 program containing USR will

# NEW GAMES THE TANDY

be printed. If none is printed the converted program should run correctly. Otherwise, you will have to assess the difficulties bearing in mind the explanation above.

#### PREPARING THE PROGRAM

1. Type in the program below and save it on a new tape i.e. CSAVE "DRAGON".

2. Now type "RUN". The program will build up the machine language program.

3. There are two checks to ensure that the DATA has been entered correctly. If the number of items is not 316 or they do not sum to 36454, an error message will be printed. If this occurs inspect the DATA very carefully.

4. If the program passes the tests, you will be asked to get the cassette recorder ready. Put a second new tape into the recorder and press the RECORD and PLAY. Press ENTER when ready. Don't use the same tape — things can get very difficult if you want to erase one program and not the other.

5. The converter will save in machine format. The name of the program is "DRAGON". Four copies are saved.

#### OPERATION

1. Switch on the Dragon and type "CLEAR 200,31999". This will keep the routine safe.

2. Rewind the tape containing the machine program and load it i.e. CLOADM "DRAGON".

3. Now load the TRS-80 program written in Basic.

4. Type "EXEC 32115".

5. The program will print out line numbers of any USRs.

6. When conversion is complete, LIST the program. It should now make sense.

7. CSAVE the converted program on a new tape.

8. Do not RUN it if you have further programs to convert since programs using protected memory are liable to run the converter.

9. Check the programs and the USRs once all conversions are complete.

By the way, the program does not work in reverse! You cannot convert a Dragon program back to the TRS-80.

# ARCADE

## LEARN THE PHAROAH'S SECRETS

### TIPS ON TUTANKHAM

Tutankham has a natural appeal to the watcher, but it is a confusing game for the beginner as he struggles to find his way through the maze of tunnels to the legendary treasure of the tomb.

It's a maze game with a difference as you can't see the whole maze at once, just a collection of rushing bats, snakes and birds, the undead creatures of the pharaoh's tomb, whose touch is lethal.

These have to be shot, smart-bombed or dodged as you grab the treasures and keys necessary to progress.

You begin your expedition with two smart bombs and three men and one extra of each survives

every 20,000 points. Smart bombs are shown as lightning at the top of the screen and clear the whole area you are in at the time.

The first screen takes you up past the enemy's house where monsters issue forth and into a secret tunnel through to the second screen.

The tunnel is only opened by the key which must first be grabbed by the adventurer. 1,000 points are awarded for getting the key and there is a time bonus to be scored by getting it into the lock soon after the start of the screen.

If you run out of time then your fire power vanishes and you have to get to the lock before the enemy get to you.

The second — and all subsequent screens — need two keys for two locks, collected in the order: key, lock key, lock.

Your live ability is lost and stabs out both ahead and behind you at the same time. But it is limited, it can't be used in vertical passages. The monsters realise this and rush you in the vertical passages while lurking and waiting in the horizontal ones.

These adversaries often have their little dens situated on main highways through the maze and challenge you to get past.

The maze is set out as underground tunnels with large open spaces, supposedly giving the effect of the passages you might find beneath a pyramid.

The open spaces can be particularly dangerous when the creatures can attack from all sides.

For bonus points pick up the beesmies, either a chest or a ring, that are dotted around the screen. The first of these is worth 500 points, the next 1,000, the next 1,500 and so on.

Smart bombs are often best saved for the rush to the last lock, when monster activity is at its height. If in doubt check the radar scanner at the top of the screen.

Getting past a den is a case of waiting until a spurt of monsters dies down and then rushing, guns blazing past.

The snakes and birds are predictable but bats are fast and erratic. If something closes its jaws around you as you approach your run-in to the final treasure, you can usually be sure it's one of these.

One thanks to Carl Warrington of Leicester for the tips.

## POINTS FOR CRASHING

Burning Rubber is the first car race game which encourages you to slam into other competitors.

Simulating the stock car races where the aim is to crunch as many opponents as possible, Burning Rubber gives points for bumping into rivals and sending them spinning from the track.

The danger is that each contact will also send your own car screeching towards the track perimeter, so that you must leave yourself room to control the swerve before hitting the hedge boundary.

Burning Rubber is a racetrack which is locked down on from above, it levels in a straight line scrolling down from the top of the screen.

Unfortunately the course seems to be set in a river delta and the track is constantly being interrupted by stretches of water. These sometimes have narrow bridges across their depths, other times the track

### BURNING RUBBER

continues on islands in the centre of the waterways.

Luckily a jump button will let you out of trouble and actually help boost the score if you can successfully manage to land on an unsuspecting opponent.

The only restriction on jumping is that you must be up to a certain speed before you can take off. That speed is achieved quite easily and then there is nothing to stop you leapfrogging around the track, over opponents, rivals and intruding hedges.

Nothing, that is, except a tendency to slow down drastically when landing on an opponent and a certainty that a wetter death awaits anyone landing in the drink.

Other hazards come mainly from your fellow road users. These vary from hole-digging tractors, to almost unmovable caterpillar tread trucks.

## SEND YOUR BEST SHOT

Hurry up and send in a top score, if you want to enter our 1983 Video Games Championships.

The grand final takes place at the end of June and we'll need your top score in by June 23rd to make you eligible to win a place at the finals.

A form can be cut out of the magazine on page 11 and taken around to your local pub, club or arcade to fill in the best score you can on your favourite machine.

You can enter on up to three different machines. The prize is a brand new arcade game from

Telet Electronics, one of the new summer releases which will be in the winner's home before it's in the arcades.

And if you make your top score while your magazine is still at home ask the arcade owner if he has an entry form. We are distributing forms to many arcades, pub and college sites.

If you have entered already there's nothing to stop you improving your score in the meantime and sending it in on this month's form but please ensure that every entry is witnessed by the pub, club or arcade owner.

# ACT UP

## PINBALL

So you think that all pinball machines look the same eh? Just a playfield and a sit-np-and-beg backslap! Well, have we got news for you! The word is that Williams are bringing out a pin that could revolutionise the image of the pin table forever. Well, not the next revolution anyway!

Based on the Williams video game called Joust — which has tusked flying beasts and gallant knights — the company's new pin can be played by two players. So what's new about that, I hear you ask. But they play both at the same time — ever seen that before smartly!

Yes, Joust — the pinball, can be played by two players at opposite ends of the table and is the attacker, the other the defender. Roles reverse when the ball is lost.

Meanwhile back to the more conventional side of the pinball market and Zaccaria have a new pin called Time Machine.

The special feature on this machine goes into action when you get the ball into a saucer about two-thirds of the way up on the left hand side of the playfield. Then the three pop-bumpers disappear into the bowels of the machine and a flat surface takes its place. This takes you into the "past". When the bumpers are up it's the "future". This feature makes Time Machine two games in one.

## ALIENS TAKE A TUMBLE

For Scramble and Zaxxon fans who enjoy a good battle over scrolling scenery, Xevious holds new graphical and action thrills.

The story is set in Earth's future with the massive Xevious fleet gradually taking control of the world we humans know as home.

In true Boys' Own style, a hero is despatched to strike deep into the Xevious' home territory and destroy their mothshead.

Xevious forces are to be found on the ground and in the air. Bombing and lining away as he did in Zaxxon, but this time from a different angle and viewpoint the player takes on one batch of Xevious after another. Each wave gets progressively difficult.

That legendary bid of fortune, the Roc, takes the place of Donkey Kong's stilet in a new game: Roc n' Rope.

The Roc is every bit as elusive to capture as Kong's stilet was to save and like her, it leaves hints to its whereabouts strewn around the vicinity in the shape of golden leathers.

Mario's place is taken by an intrepid explorer who is betting on new technology to take him past the horrors and dangers of the primeval labyrinth of caves, bees and terrors.

Whether or not his bet is well-founded, depends on you as you guide his progress to the Roc at the top of the screen. The first screen is laid out with rock ledges. You climb with the aid of a rocket gun which has a rope attached to its pointed tip. As it imbeds itself in the next level, you anchor the Roc and begin your ascent. Cavemen and dinosaurs are out to stop you but you

### XEVIOUS

A crosshair sight preceding his craft helps the player judge his range.

It all sounds too familiar, the difference Xevious boasts is in a detailed and varied backdrop to the action and some marvellous effects from the opposing fleet as they roll, tumble or zoom in towards you.

My own favourites are the tumbling mirrors which spin slowly as you approach them.

The Mothshead also puts up an almighty barrage to prevent you placing your ranging site over its vulnerable core.

Rivers, roads, forests and airports form the backdrop to the action. Operators are given a lot of leeway over how difficult Xevious can be for the beginner, so if you find it too hard or too easy have a word in the arcade owner's ear.

## A LONG HAUL AFTER AN EXOTIC BIRD

### ROC N' ROPE

are equipped with a flash which can be used to blind them.

Cavemen are quite capable of following you up a rope or shaking you down from it, but flash blindness renders both they and the dinosaurs helpless for a while.

The cave-dwellers can change levels by climbing up or down vines and are difficult to shake off your trail. Points are gained for picking up golden feathers and if the player finds a golden egg he will become super-powered and invincible for a while, destroying his enemies at a touch.

Rock stairways, fountains and a prehistoric revolving door type escalator, feature in the later screens but the dinosaurs and cavemen are to be found on every one.

Like most of the Kong type games, the successful players will memorise a good route and follow it to the top again.

## DON'T LET THEM BREAK YOUR CHAIN

### DOMINO MAN

Remember waving up a snake of dominoes and sending it sprawling with a careless flick of your little finger at one end or another?

Well domino flicking is big business in the States at the moment with teams trying to produce new record flicks and ever more impressive displays.

The trend is recreated in Domino Man where you take the title role and set up dominoes in a chain between the supermar.

Dominoes are set up merely by touching them but you have to do it before an old lady with a bag, a bully, or a little boy knocks part of your chain over. You can knock them out of the way. Then there's this bee which wanders around so slowly that you may feel tempted to go and find out what it's doing on screen — don't, it stings!

After conquering the supermarket you can move onto the golf course, where a small dog threatens domino destruction or onto the construction site.

You can trap certain of your enemies in the domino chain for extra points and other bonuses can be achieved by finishing your screen in a good time.

The dominoes are laid out in easy to assemble chain and tactics usually centre on whether you go for a whole chain at once or shorter chains which are easy to rebuild if knocked over.

Howdy partners. My name is Killer McGrew and this here's my gang, The Ringo Kid — he's the one with the ring through his nose — and Sid Lightning — so called because of the ragged scar on his cheek.

A couple of the nicest guys you're ever likely to come across in this here town. Unless of course they don't like the way you look. Then they can get quite nasty. That's why it's just as well to pack a mean sex-shooter and be very quick on the draw!

This here game will give you a bit of practice, just in case you come up against an 'omey old gunfighter in the street one fine day.

This program uses both here's pages on the Apple and is just under 6k in length. Therefore it is a very tight fit below here's page 1 and so there are no REM statements in this program and the line numbering is fairly crucial!

# SOFTWARE

## XENO II

An EXPANDED-D screen presentation with superb action packed space thriller written entirely in machine code with four action packed stages. To destroy the power source of Xeno II you have to fight off waves of robot attack plasma bombing by the legions of the outer sanctum and finally attack the power source protected by a force field continuous bombardment by guardians and blockaded by wild whirling suicidal space ships. Truly a game for all arcadians

JS VIC 20 16K £7.90

## CAVERN FIGHTER

All M/C version of SCRAMBLE Lasers bombs continuous scoring and sound effects give all the thrills of arcade game. Pilot your space ship through the tortuous tunnels and caverns destroying enemy missile launchers fuel dumps and airborne fire saucers. Four ships to complete mission 10 skill levels

KB/JS VIC 20 Uncxp. £8

## CRAWLER

All M/C version of Centipede. Homing spiders mushroom laying fleas and multi-direction travel makes this game fast and furious with 10 skill levels

JS VIC 20 Uncxp. £8

## PHARAOH'S TOMB

Once you enter the only way out is with the aid of a key which unlocks the mystery of the Pharaoh's tomb. Beware of the mummies the ancient Egyptians so painstakingly built. One false move and you will meet the same fate as belated tomb robbers over thousands of years. A multi-screen big graphical adventure with M/C movements

KB VIC 20 16K £8.00

## SEVEN PROGRAMS (VOL 1)

Seven games for the whole family. Board game Othello plus Bomber, Slalom, Bounce out Lunar Dockar, Memory and Snake.

KB VIC 20 Uncxp. £8.00

## SEVEN PROGRAMS (VOL 2)

Another Seven games pack for the family. Graphical Adventure, Goblins Gold, plus Dara Devil, Ghosts, Grand Prix, Breakout, Cobra and Minifield

KB VIC 20 Uncxp. £8.00

## SOFTWARE WRITERS

We are looking for top class writers to join our growing software team. If you have written a quality game, please contact us on 02934 6083. We pay 10% royalties for accepted programmes

24 HR. CREDIT CARD SALES HORLEY (02934) 6083

## KRAZY KONG

An EXPANDED-D screen large graphics rolling barrels hammer fireballs and handbags and umbrellas as you try to rescue the damsel Kong has abducted. Spectacular collapse of Kong's lair in the fourth screen. Uses all 256 of the expanded Vic for this 100% M/C thriller. Completes with high score table

KB/JS VIC 20 16K £7.90

## GALACTIC ABDUCTORS

NEW

A stunning action packed game which uses all your TV screen for the snipch large animated graphics. Giant Space Hawks whirl and weave in intricate patterns as they drop their deadly homing mines which will destroy your base on contact. While you are busy defending yourself the Hawks will feed on your helpless population returning only their skulls. All M/C game complete with high score table that will blow your mind with its graphics and sound effects.

JS VIC 20 16K £7.90

## FROGRUN

NEW

Popular arcade game. All machine code with brilliant colour graphics and sound effect. Features include snakes, crocodiles, lady frogs, turtles, cars, leaves and logs

KB/JS VIC 20 Uncxp. £8  
KB/JS SPECTRUM 16K/48K £8  
KB/JS COMMODORE 64 £8

## ORACULA

Count Dracula is asleep somewhere in his castle. He rises at midnight and you must find him and drive a stake through his heart before he rises. A multi-screen graphic adventure

KB VIC 20 3K £8

## TINY TOT'S SEVEN

Seven games pack for younger children with bright colour graphics and sound effects. Everbody's favourite Simon plus Super Snap, O and K's Word Jumble, Bomber, Drick Shoot and Mad Drivers

KB VIC 20 Uncxp. £8.00

## 3D TIME TREK

NEW

At last a 3D game for the VIC! Although only worded you are determined to seek and destroy the marauding space pirates who have now dispersed around the galaxy in search of fresh prey. A brilliant Star Trek game with a difference. Spectacular 3D graphics and real arcade actions

JS VIC 20 16K £8.00

# The June Top Ten in Spectrum software at W.H.Smith.

The range of software available for the Sinclair Spectrum is to say the least, extensive.

So every month at W. H. Smith, we review the range with particular reference to presentation, challenge, excitement and value for money. And because we're quite severe it's a difficult job finally to arrive at a Top Ten. But as you can see, not impossible.

You don't have to take our word for it.

At W. H. Smith we stock the widest selection of Spectrum Software, so you can judge for yourself.

# BAT AND BALL

**RUNS ON A BBC MODEL A OR B IN 16K**

**BY STEVE HEAP**

This is an interesting variation of those very early bat and ball type video games which heralded the arcade boom all those years ago. It was written primarily for the BBC Model B but can easily be converted to work on the A or B from the keyboard.

The object of the game is to trap a bouncing ball in a coloured rectangle in the top corner of the screen. To do this a continuous line is drawn using the joystick (or keyboard controls) which slowly confines the ball in a smaller and smaller area until it is finally trapped. But beware — the ball has a nasty habit of escaping through the smallest gap in your defences!

If you are successful and manage to catch the bouncing ball the time you take will be displayed — together with the best time so far. The fire button on the joystick sets up a new game at any time.

The game can be converted to work from the keyboard by changing/adding the following lines

```

20 ON ESCAPE WITH 600
40 WFX1, 1
60 #X11, 1
80 #X17, 0
100 IF INKEY$(0)="" THEN GOTO 66 ELSE GOTO 140
120 IF INKEY$(0)="" THEN GOTO 66 ELSE GOTO 140

```

# For the best hardware, the best software.

The BBC Microcomputer system is generally regarded to be the best micro in its price range you can lay your hands on. So, if you're thinking of buying one or already own one, you'll want to know about the software that's been specially designed for it.

Not surprisingly, it's made by Acornsoft, the software division of Acorn Computers Ltd., who designed and built the BBC Microcomputer. So naturally you can expect the highest quality software with the built-in ingenuity to fully exploit the BBC Micro's potential.

## Further education for everyone.

**Number Balance** (price £11.90) contains two programs on cassette for practising simple mathematical operations from numbers 1 to 20. The object of the exercise is to make a balance level by inputting the correct missing number into one side of a simple equation. Incorrect answers will tilt the balance in the appropriate direction; after three incorrect attempts the program responds with the correct answer.

**Chemical Analysis** (price £13.80) contains three Chemistry programs on cassette and a booklet. 'Elements' presents a series of mystery elements which the student is asked to identify. 'Inorganic' presents a series of inorganic substances to be

identified by performing tests selected from a menu of standard tests. 'Organic' is a program dealing with organic compounds.

## Learn more languages.

**LISP** (price £24.35) is the fundamental language of artificial intelligence research.

It is easy to learn, and is widely used for writing substantial and sophisticated programs, with practical applications including design of education systems and medical research.

It comes complete with a book that introduces you to programming in LISP, as well as some fascinating applications.

**FORTH** (price £24.35) is a complete implementation of the FORTH language to the 1979 standard specification for the BBC Microcomputer Model B. This much acclaimed programming language is also accompanied by a specially written book explaining all you need to know.

## Mind-boggling games.

**Sphinx Adventure** (price £9.95) is a full-sized classic adventure game in which you move through caves, fight with trolls, collect treasure and finally make your way to the sphinx.

to collect your reward.

**Missile Base** (price £9.95) sees you as Moon Base Commander, and you must ward off the salvos of deadly neutron missiles falling from space onto your base. As the game progresses, intelligent missiles arrive on the scene. They must be destroyed with cunning. Comes complete with satellites and planes and includes a table of high scores.

**Monsters** (price £9.95) is a game where your man is pursued by monsters who chase him up and down ladders and along walls. The only hope of survival is to dig holes in the walls and trap the monsters by filling them in. Complete with sound effects and high score.

#### Increase your business arumen.

**VIEW** (price £59.80) is a program that enables your machine, together with a printer, to operate as a fully operational word processor. For convenience the program is in ROM so that it can become a permanent feature of your machine. (It can easily be fitted by your local dealer.) You'll find out more by going to your dealer or by sending for the free catalogue.

#### How to get Acornsoft programs.

If you're a credit card holder and would like to buy cassettes of the programs shown in this advertisement, or if you would like to know the address of your nearest stockist, just phone 01-200 0200.

Alternatively you can buy the cassettes directly by sending off the order form below to: Acornsoft, c/o Vector Marketing, Denington Estate, Wellingborough, Northants NN8 2RL.

Also use this form if you would like to receive the current free Acornsoft catalogue.

Please allow 28 days for delivery.

**Credit Card Holders. Ring 01-200 0200.**

To Acornsoft, c/o Vector Marketing, Denington Estate, Wellingborough, Northants NN8 2RL.

Please send me the following:-

# ACORNSOFT

# PROTECTOR

Space piracy is ruining the economy of your sector of the galaxy and the Star Fleet Command have ordered you, the skipper of an interstellar customs cruiser, to wipe out the pirates at any cost. Their plundering means that galactic taxes may have to be put up, — and there's an interplanetary election coming up!

Blasting off from your HQ after picking up your orders you soon pick up the space pirates fleet on your scanners. They are approaching you in force and closing fast. The odds are six to one. Your only chance is to quickly switch to hex-drive, which will give you two minutes of super-power and enable you to out manoeuvre the pirate ships and blast them out of the sky. Can you end the pirates reign of terror?

Your score will be shown at the top of the screen, and also the time you have left to complete your task. The high score is also shown.

The program is listed in two parts. First the user-defined graphics and second is the main program.

Program notes:

100-160: main loop 400-460: ground movement routine, 500-565: joystick and your movement routine, 600-710: space pirates movement routine, 800-980: laser gun routine, 1600-1050: end of program routine.

# ORIC SOFTWARE from TANSOFT

## ORIC CHESS

A superb chess game written in Basic with a Machine Code Move Search Routine. Features high resolution colour graphics, record of moves, allows Castling and En-Passant, 5 levels of play and computer can play black or white.

**ONLY £9.99 inc VAT**  
48K only

## ZODIAC

A 36K adventure game that will test your intelligence and patience for hours. Find the 12 hidden signs of the Zodiac to discover incredible treasures. Can you ward off the angry Yeti? What is the meaning of the radio that plays the 'Archers' over and over again (through your loudspeaker)?

**Only £9.99 inc VAT**  
48K only

## ORIC FLIGHT

Can you fly your new 787 jet on to the runway without crashing, stalling or running out of fuel? Full digital instrument readout plus cockpit view of final runway approach. Superb graphics and sound.

**Only £7.95 inc VAT**  
48K only

THE MEN WHO INVENTED HE WERE  
CLEVER ENOUGH TO MAKE ME THINK  
IN 'FORTH' (IT'S 10 TIMES FASTER  
AND 4 TIMES MORE COMPACT THAN  
'BASIC').

YET THEY'RE DUMB ENOUGH TO SELL  
HE FOR £89.95!.

Richard Altwasser and Steven Vickers are the men who invented the Jupiter Ace.

After years of designing microcomputers that use BASIC (both men played a major role in creating the ZX Spectrum), they abandoned it in favour of FORTH.

FORTH is just as easy to learn as BASIC. Yet it's a faster, more compact and more structured language that educationalists and professional programmers alike prefer.

So the Jupiter Ace is the only micro computer you can buy that is designed around FORTH.

Using it, there's little fear of accidentally crashing programs halfway through and having to start all over again (a common fault with BASIC). The Jupiter Ace's comprehensive error checking sees to that.

The Jupiter Ace has a full size keyboard, high resolution graphics, sound, floating point arithmetic, a fast, reliable cassette interface, 3K of RAM, and a full 12 month warranty.

You get all that for £89.95. Plus a mains adaptor, all the leads needed to connect most cassette recorders and TV's, a software catalogue (35 cassettes available, soon to be 50), the Jupiter Ace manual and a free demonstration cassette of 5 programs.

The Jupiter Ace manual is a complete introduction to personal computing and a simple-to-follow course in FORTH, from first principles to confident programming.

Plug-on 16K and 48K memory expansions are also available at very competitive prices (There'll be a plug-on printer interface available soon, too).

It'll take you no time at all to realise how clever Richard and Steven were to design the Jupiter Ace around FORTH. And even less time to realise what a silly price £89.95 is to charge for it.

#### Technical Information

##### Hardware

280A 8K ROM 3K RAM

##### Keyboard

40 moving keys, auto repeat, Caps Lock

##### Screen

Memory mapped 32 col x 24 line flicker free display upper and lower case asc characters

##### Graphics

High resolution 256 x 192 pixel user defined characters

##### Sound

Internal loudspeaker may be programmed for entire audio spectrum

#### Cassette

Programs and data in compact dictionary format may be saved, verified, loaded and merged. All tape files are named. Running at 1500 baud.

#### Expansion Port

Contains D.C. power rails and full 280 Address data and control signals. Can connect extra memory peripherals.

#### Editor

Allows complete editing and listing of compiled programs.

Please send cheque/postal order to Jupiter Computers Ltd., North Wing, Freemasons Hall, Bateman Street, Cambridge CB2 1LZ.

## Jupiter ACE

Please send me Jupiter Ace microcomputers @ £89.95 (+ £3.95 p & p).

# Snakes

You can't escape the coils of this snake as it writhes around your Dric and charms even the most world-weary games player. If you've played the arcade game Centipede or some similar game, you'll know just what this is all about.

If not this is what you'll see. Your slippery Dric snake has to be steered around the screen with the cursor keys, gobbling up numbers which appear at random. Each time you hit a number, the length of the snake increases in proportion to the size of that number — say if you eat a 5 you'll get five extra coils, and so on.

Unfortunately your snake exists in a very confined space and the more he eats the bigger he gets and the less space there is to move around — and if he crosses his own path or bites his tail then the game is all over! Oh yes, just to make things a little more interesting the screen border is definitely no place for a snake to stray. If you hit it you are dead!

This is an addictive little game which you'll be playing again and again just to get the elusive high score.

Holy Moses! God has sure given me a tough task this time. I was sitting minding my own business, thinking holy thoughts, when there was this great clap of thunder, a flash of lightning, and this voice that filled my head until I thought it was going to burst!

The voice said, "I God, instruct you Moses to lead the Israelites away from Egypt to the Promised Land. But beware as the Pharaoh will pursue you with his armies and attempt to make you slaves again. Take the road towards the Red Sea and freedom.

I will help you provided no more than 2000 Israelites die on the journey. I have one miracle that I can use to aid your escape — but you must reach the Red Sea first. The Promised Land lies on the other side of this sea which you must cross.

Then you must take the Israelites to the place of the tablets, on which are engraved the Ten Commandments. Here you will be safe from the Egyptians and any other dangers."

So that's why we are trudging across these parched lands towards our Promised Land — with the Egyptian Pharaoh's armies hot on our heels.

# The magic of the microcomputer without the mystery.

Everything you've ever wanted to know - or learn - about microcomputers is now at Micropoint. In all branches of Laskys. Micropoint has all you need to make up your mind about microcomputers. You'll find a wide choice of models - and you can test play them all, comparing each model with the next. It has experts who will explain micros to you, in language you can understand. Micropoint has a big selection of programs - they will really make your micro magic.

But you get even more than machines and advice, you get good value too. At Micropoint we keep our prices low by buying in volume and we'll also help you to buy with Interest Free Credit\* available on purchases over £250 or more. You also get the famous Laskys Commitment possibly the best after-sales package ever offered, with a 14 day exchange period, a 2-year free guarantee and service by Laskys own network of specialist engineers.

Whether you're browsing, about to buy your first computer or looking for something new, or better than Micropoint is the place to find it. Come in and see for yourself. Micropoint opens up to the whole family the fascinating, educational, fun world of microcomputers.

A full range of peripherals, including disk drives, memory expansion units, cassette storage units and joysticks is also available.

# It's the programs that make micros magic.

It means you can use it for games and for learning (anything from simple programming to a foreign language).

You can use it in the home for everything from household budgets to planning a touring holiday abroad or remembering

birthdays and important anniversaries. And if you run your own business then a micro could totally transform it for you.

Our range of programs cover Games, Household, Education and Business. We've shown just a few titles above,

come and browse round the rest at Micropoint.

# ROYAL ASCOT

The sport of kings, that's what they call horse racing. Well, now all you commoners out there can get a look in at Royal Ascot — and the price of admission is just the same as this magazine. Surprising huh?

You arrive at Ascot at the start of the day's racing with just £50 in your pocket and a burning desire to win at least £1,000. It is possible to win £5,000 plus — but that isn't easy!

Before each race you are given a list of runners and their odds. The odds are a realistic representation of the chances of winning — but there are no dead carts and the favourite doesn't always win. In a large field a long odds outsider might come romping home.

Program notes  
Line 150 decides how many runners in the race and resets Z to the screen address of the starting position of the first runner.

Line 210 selects the odds.  
Lines 220, 230 reduce the odds to the lowest denominator.

Line 250 handicaps the horse according to its odds.

530-580, the race is run between these times. The Peak in 550

checks if a horse has finished  
POKE 446, X — print X lines down.  
POKE 446, Y print Y columns in

# Let Commodore expand your horizons.

VIC 20 is the finest home computer that money can buy.

And the better you get to know it, the more confident, adventurous and ambitious you'll become.

You'll want to take advantage of the vast range of VIC software: a superb and constantly-growing selection of programs, embracing business systems, entertainment, education and many applications in the home.

Every program in the series has been designed by experts, and chosen for its quality and value for money.

VIC business software covers a wide range of applications, including spread-sheet analysis, stock control, information handling and word-processing.

A mind-blowing range of games including Scott Adams' world-famous 'Adventure' series.

Advanced space games, including the sophisticated 'Omega Race'.

Learn subjects as diverse as English Language, programming, and biology.

And 'home' software ranges from IQ tests to Robert Carrier menus.

In addition, there is a range of VIC software, like programmers' aids and graphics packages—

to add to your understanding and enjoyment of computers and computing.

There's even a special 'VicSoft Club' for VIC 20 enthusiasts, with many advantages including special offers to club members.

VIC software will expand your horizons. And your mind.

PRICES RANGE FROM £4.99 to £24.95 INC. VAT.

**RUNS ON A ZX81 IN 16K**

**BY MICHAEL NADEN**

# CANNON MASTER

You perch like some sinister bird high atop a tall and graceful battle-tower waiting for the next attack — which you know will come all too soon. The enemy is determined to destroy your fuel supplies and only you — and commander of two battle-towers which defend a blasted plateau which serves as a fuel-supply depot for your armed forces — can protect the valuable stockpile.

Will you be able to beat off the alien attack? Or will the Invaders destroy you and your planet?

Once you have programmed in this life and death struggle you will see two towers appear on the screen. The '+' signs at the bottom of the screen mark the locations of the fuel supplies which you have to protect.

There are three cannons in each of the towers which remain hidden until fired at the advancing aliens. The laser blast from each cannon will reach halfway across the screen. To make the game harder you have limited power for your cannons. If you find they do not fire you must wait a few seconds for them to recharge.

Also the aliens can destroy your weapons — but will not be harmed themselves. They can only be destroyed by a direct hit or a collision with one of the towers.

Once two fuel-dumps are destroyed by the Invaders the game is over.

The controls:

Keys 1, 2, 3, 4, or 5 fire top left cannon. Keys Q, W, E, R or T fire middle left cannon. Keys A, S, D, F or G fire bottom left cannon.

Keys 6, 7, 8, 9 or 0 fire top right cannon. Keys Y, U, I, O or P fire middle right cannon. Keys H, J, K, L or N/L fire bottom right cannon.

An Exciting range for 16K ZX81  
from SOFTWARE FARM

## SUPER SCRAMBLE

### YOUR MISSION

To penetrate the witches defences enter her cavern and destroy her wicked heart

### THE WITCHES DEFENCES

Stalagmites and stalactites - which grow across your path

**Voicnoes** - to get pest alive - if you can!

**Vampire Bats** - that cling to your ship and make controls sluggish

**Cave-ins** - should you hit the side of the cave with your Laser Cannon or Bomb - part of the roof will cave in on you

- Written entirely in machine code
- Hall of Fame
- 1 or 2 players
- Mystery score positions to bomb
- 5 skill levels

## GOBBLERS

Mk 2

Beat that high score!  
Gobble those dots before those measles gobble you!  
Your only aids are four Power Pills which make the measles edible. But not for long

- Machine coded for fast action
- Extra Gobblers for 10 000 points
- On screen scoring
- High score with enter name facility
- Up to 4 players

Improved Mk 2 version!

## ASTEROIDS

Stay alive as long as possible in open space filled with flying rocks. Score by shooting them - which also causes them to break into lots of little bits and makes life even worse!

- Machine coded for fast action
- On screen scoring
- High score with enter name facility
- Up to 4 players
- Extra ship for 1 000 points (not as easy as it sounds!)
- Ship moves just like arcade version
- Rotate left/rotate right/thrust
- Fires in all 8 directions
- Increasing number of asteroids
- Three asteroid sizes
- Alien spaceship (lives back)

All games  
£5.95 each

NEW!

## FROG HOPPER

Jump your frog over the tanks in the road preferably without being turned into jam by the approaching traffic! Then cross the river by hitching a few rides on some passing logs and finally into the safety of your hole on the opposite bank. Once all Frog Holes have been filled you start again with a different pattern and a bonus frog

- 50 Skill levels!
- Played against the clock
- Froggy only has a short while to live!

When more than one game purchased deduct £1.00 from each tape!

# C & VG SOFTWARE FORM

Have you written a games program which you feel is just right for C&VG? If so we have come up with a form to ensure that we can test it out and give you our views on it, as quickly as possible.

We would prefer a tape and listing but can work from just a tape and will return it to you if it doesn't find its way into the magazine. We will also need an additional sheet explaining the game and its theme. And any documentation like lists of variables or how certain routines are working, would be of great help to beginners. Please make sure that your name, address and the program name is on everything

you send us, including the cassette itself.

This form will merely help us to keep a check on your game as it goes through our testing process and make sure we have all the information we need to present it properly in the magazine.

If you don't want to cut up the magazine, we will accept photocopies or close copies of this page. This form will be appearing regularly in C&VG issues from now on.

Remember we pay £10 for each listing published and you could win our Programmer of the Year Contest where we will try to turn the winner into a best-selling games author.

## GAMES THAT ARE HARD TO BEAT

Why? Because every single Romik game is professionally written in machine code to give you all the thrills and action of a fast-moving arcade game. Every one recorded on top quality tape, most of them playable either from the keyboard or with joysticks.

A lot of thought and development goes into every game – and we guarantee no bugs to drive you mad, no infuriating gaps to interrupt your fun.

Whether pitted against Invaders from alien worlds, tracking hungry sharks or frantically stalling the melt-down of a nuclear reactor you can be sure that if it's a Romik game you'll have a battle on your hands. The kind of battle that leaves no room for mistakes or hesitation.

### COMING SOON

Romik promise at least one new game every month, and soon there'll be Romik games for the Atari, Spectrum and Lynx computers.

### FREE COMPETITIONS

Every action game purchased brings a free entry into the national competition to find the Supreme Champion, and free entry into the annual Romik Grand Master competition with its fantastic prizes.

### TOP PRICES PAID!

We're always on the lookout for new, top quality machine code arcade games for any machine. If you have what you consider a marketable game – let us know. Nobody pays higher royalties than we do.

For further details of all our games and a list of stockists complete the coupon and send it to:  
Romik Software, 272 Argyll Avenue, Slough SL1 4HE

**ALL GAMES COST £9.99**

## Dynamic Games for the ZX Spectrum

**Dynamic Games for the ZX Spectrum**

by **Tim Hartnell**

Tim Hartnell has selected 20 dynamic games of lasting interest. They range from board games like *CHES* and *PIRANDELLO*, to arcade action in *JOGGER* and *DEATHRACE 2000*, and include a major adventure game, *REVENGE OF CASTLE BREAD*.

A detailed introduction is provided for every game and, in most cases, the program is explained line by line, highlighting the tricks the programmers have used and suggesting how these can be applied in other programs and games. At the end of the book a chapter is devoted to suggestions on how to improve your own programs.

## The ZX Spectrum Explored

by **Tim Hartnell**,  
Foreword by **Clive Sinclair**

In this practical guide — with programs throughout — Tim Hartnell takes his readers from their first steps in programming to how the ZX Spectrum can be used as a tool at home, at work and for education. He looks at the use of sound, colour and 3D graphics, and shows how to write programs in BASIC, as well as how to use machine code on the ZX Spectrum.

*The ZX Spectrum Explored* is complete with many programs for education, business and — not least — pure fun!

# TRENCH

The deadly Death Star is threatening your peaceful planet with absolute destruction. Soon it will be close enough to unleash the deadly power of its Ultimate Weapon which will wipe your home star off the face of the universe. Your only chance is to attack before the Star gets close enough to blast the planet.

Your best space fighter pilots have been briefed about this mission. They know they may not return. They must attack the Death Star's most vulnerable spot — which can only be reached by flying down a narrow "trench" on the star's vast superstructure.

The trench will be protected by fast Tie fighters, flown by the Imperial Alliance's most accomplished pilots, and there are laser cannons posi-

tioned in and around the trench itself.

You join the action just as the rebel fighters are zapping down in to the trench to do battle with the Imperial forces. Your ship is protected by an energy shield which is depleted each time an enemy cannon scores a hit on your craft.

You have to travel along the trench shooting down enemy fighters and when the radio-active waste exhaust chute opening appears you must score a direct hit on it to restore your shields and destroy the deadly Death Star.

You must shoot down all your attackers too — if you simply dodge one he'll be back to blast you out of the skies when you least expect it.

So stand by for action — and watch out for the Imperial fleet!

# VECTREX

THE REVOLUTION STARTS HERE

## THE ULTIMATE COMPUTER GAMES SYSTEM.

Vectrex has its own built-in screen. It actually reproduces the same brilliant graphics, exciting sounds and fast game play of a real arcade machine.

Vectrex comes complete with its own built-in game 'Mineslorm', but you can play many other classic games such as 'Scramble'\* and 'Berzerk\*\*' by simply slotting in a cartridge.

This portable system is complete with its own built-in control panel featuring an analogue joystick and four action buttons.

Try the ultimate computer games experience with Vectrex.

Milton Bradley Limited, CP House,  
97/107 Uxbridge Road, Ealing,  
London W5 5TZ. Telephone:  
01-567 3030.

# LLAMASOFT!!

MORE THAN JUST A PRETTY PACKET!

## \* ATARI OWNERS !!!

Now for  
VIC 20,  
COMMODORE 64  
ATARI

Just  
£8-50  
for your  
ATARI!

J = JOYSTICK CONTROL

### VIC 20

#### LASERZONE (8K +)

Destroy the oncoming ALIENS with your TWO independently controlled laser based turrets for the ELECTRO button and blast your enemies into an expanding cloud of SPACE JUNK! An exhilarating and totally original game with a unique system of control from a standard joystick. A mere £6.00 + 50p P & P

#### ABOUCTOR

A classic new space game! ZAP the swarming alien hordes before they rain you — and protect your humans! Survive the assault for long enough and you'll get an extra stage on your spaceship with double firepower! Awesome unopposed! Vic Action £6.00 + 50p P & P

#### GRIDRUNNER

Finally true arcade quality on the unopposed VIC! Shoot down the segmented DRAGON invading the grid. Beware of the pods and zappers! The awesome speed sound and graphics give you the best blast available for unopposed Vic £9.50 + 50p P & P

#### ANDES ATTACK (8K)

Your spacecraft must attack the descending aliens and explode their evil intent! Fly your Rocket lighter over the Andes mountain range and protect your flames from being by remote UFOs. Features 5 kinds of UFO, controls include up down reverse fire. Visual and smart bomb. Entirely in machine code. Requires 8K expansion and joystick £9.00 + 50p P & P

#### TRAXX M C (8K + EXPANSION)

This is VIC 20 cross breed between the now famed Packman and the game Duke. All in machine code. Fast and fun with joystick controls. Uses Hi Res colour graphics 8K or 16K expansion needed. Only £6.00 + 50p P & P complete with instructions

### COMMODORE 64

#### ATTACK OF THE MUTANT CAMELS

Planet Earth needs you! Hostile aliens have used genetic engineering to mutate camels from normally harmless beasts into 90 foot high neutronium shielded laser-firing death camels! Can you fly your tiny manoeuvrable fighter over the monstrous landscape to weaken and destroy the camels before they invade the human strip? You must withstand withering laser fire and alien UFOs. Game action stretches over 10 screen lengths and features superb scrolling scenery. 12 player action and unobscured animation! Play this game and you'll never be able to read a 200 again without getting an icky trigger finger! Awesome vic action! £8.50 + 50p P & P

#### ROX-64

Rox is a challenging game involving the defence of your lunar base from a deadly meteor shower. Rox-64 includes amazing sprite graphics displays and easy sound!

### ZX81

#### CENTPEDE (16K)

The ORIGINAL game from the ORIGINAL author. This is the identical program to that being sold by other companies for three times the price. The game has received ecstatic reviews in the computing press. Program has 30 speed levels and a new moving Centipede horse! Tables top 10 scores and names. Why not to play now? Only £1.00 + 50p P & P

PLEASE ADD 50p TO ALL ORDERS

\* The POWER of the grid is with YOU!

\* Now available for —  
ATARI 400/800 —  
16/32/48K

### \* GRIDRUNNER

\* Play the bestselling VIC/COMMODORE 64 game on your ATARI.

\* Discover one of the FASTEST, MEANEST and most compulsive SHOOT-EM-UP games ever devised!

\* 100% Arcade quality machine code — supplied on AUTOBOOT TAPE CASSETTE — guaranteed to wear your joysticks out!

\* Don't pay ATARI prices for ATARI quality!

effects and an awesome mothership display if you win the game. Top 10 scores are listed along with their names. This program shows just what can be achieved using only Commodore-64 basic. Study the listing and learn how to use sprites and sound on this outstanding machine. £4.95 + 50p P & P

### GRIDRUNNER 64

The No 1 best game for the Vic has been improved for your COMMODORE 64! Gridrunner is a smash hit in the USA. Now experience the lightning fast challenge of the grid on the 64. Features 21 skill levels and a brilliant sound and graphics. Save trigger finger with every career! £8.50 + 50p P & P

### SPECTRUM

#### GRAPHICS CREATOR (16K)

Not just another character editor! Allow you to define not only the 2" square definable Not just another character editor! Allow you to define not only the 2" square definable Not just another character editor! Allow you to define not only the 2" square definable

#### BOMBER (16K)

Yes, a full feature version of the popular game Blitz, supplied for the 16K or 48K Spectrum. For only £2.95 + 50p P & P

#### HEADBANGER (48K)

Colours new game starting! Chop the headbanger who you must guide to riches through an increasing shower of heavy metal. Get bonuses for headbanging but be sure to take an aspirin when the pain gets too much! Basic — m.c. to speed up action. Great graphics, nice animation. Will even drive William Stuart's system to vocal hysterics to produce superb output. Can you attain the grace of Rodan Case One or will you be Rocky Mountain Cries? 5.7 Start is a staggering 10-day and find out. £4.95 NEW

#### SUPERREFLEX (48K)

Source: Sid, the space invader, around the screen into the power pads, keeping away of course from the devil who chases you around the screen. Saver with your Delta shields, but beware the mine or you may be burned alive! Superb graphics and fantastic sound on the 48K Spectrum only. Only £4.95 on cassette + 50p P & P

### ATARI 400-800

#### GRIDRUNNER

Now play the best selling VIC-G64 game on your ATARI 400/800. Any memory size (16-48K). Basic code not required — 100% machine code turbofoot tape. Play this sweetly fast and addictive game on your Atari. For only £8.50

#### TURBOFLUX

Superb ultra-fast and totally new ball game. Uses ATARI's unique features to the full. Incorporates superb colour sound effects and uses Player/Missile graphics. Tables top 10 scores along with Super names. £9.00 + 50p P & P

## THE DUCHESS AND KAISSA

I left you with a celebrated position (figure 1) from the first round game between Duchess and Kaissa, at that time the reigning world champion program, at the second world computer chess championship in Toronto in 1977.

In the diagrammed position, Duchess (White) had just played 34. Q-R8ch, a check which can be parried by a King move to N2.

However, Kaissa's next move astounded the entire audience, which included former world (human) champion Mikhail Botvinnik and other strong masters, plus the team of expert commentators.

It played 34... R-K1, placing the Rook en prise. After Duchess' 35 QxRch, Kaissa lost quickly. The task for Kaissa's programmers before the next round was to find out what caused the program to commit such a gross blunder and correct the fault.

Only later was it realised that Kaissa's 34th move was not a blunder at all. If instead Black had played 34... K-N2, White could give checkmate by the Queen sacrifice 35. Q-B8ch! followed, after 35... KxQ by 36. B-B6ch.

Whether Black now were to play 36... B-N3 or 36... K-N1, 37. R-B8ch would be checkmate (apart from irrelevant sacrifices by Black to delay the end by a move or two).

Kaissa's evaluation function clearly ranked losing a Rook as preferable to being checkmated, which solves the mystery. However, the question remains: is 34... R-K1 a blunder or a brilliancy?

## ROOK DILEMMA

It is surprisingly difficult to answer this with confidence. Objectively, losing a Rook must be preferable, but it could be argued that losing the Rook is only slightly less fatal: does not postpone checkmate very long, and moreover even the humblest beginner would capture the Rook, whereas even quite a good player might just conceivably

overlook the checkmate.

Against an opponent who played 34. Q-R8ch in full knowledge of all the variations that could follow, it makes little difference what Black plays, the best course of action probably being to resign, but what if White had played the check in ignorance, simply as an "irritant" to Black?

What if White were a weak player and Black a Grandmaster (an unlikely event admittedly, but quite possible in a simultaneous tournament or in a maternal odds game?)

## STAYING ALIVE

Would it be better to move the King and rely on White not following up properly (as well as the checkmate there is the strong reply 35. R-B8, of course) or to give up the Rook to guarantee staying "alive"?

and then hope somehow to win even though a Rook behind in material?

The problem becomes more difficult if the details are changed a little: what if Black were already a Bishop ahead or if the checkmate were 10 moves (each side) deep, or both?

Considerations of this kind are far from irrelevant in computer play, where programs can often vary considerably in analytic powers, and where a program will frequently be "blind" to a strong move which human experts perceive easily.

It would be completely wrong to assume that all computer chess programs are deep or infallible analysts (although some are extremely good).

In particular it would be a mistake for the best analyst (BELLE at present) to assume all its opponents were equally good.

There is a well-known joke about an ultra-intelligent chess-playing program considering its first move in a game, as White.

After hours of analysis it decides that the opening position is, after all, a forced win for Black in every variation.

Rather than waste any more time defending a hopeless position, it immediately resigns without playing a move!

The flaw in the argument is, of course, that chess is a contest: where the opponent's fallibility plays a crucial part.

So how would Kaissa have made its decision? From a competitive viewpoint, it should have taken the strength of its opponent into account.

No doubt Duchess was strong enough to win when a Rook ahead, but would its analysis algorithm have caused it to consider the Queen sacrifice?

If it did, would it have been able to look far enough ahead to discover the checkmate?

In more subtle ways, judgements about the skill level of the opponent are an important part of human play. Grandmasters prepare specially for their major opponents by studying their games and playing style, and looking for weaknesses.

It is interesting to speculate whether chess-playing programs of the future will include representations of their main rivals' algorithms in a similar way.

BY MAX BRAMER

# KAYDE

**In the Valley, no one can hear you scream**

Death stalks the Valley at every turn. Nowhere is safe and you're on your own. You survive on your wits alone with nobody to help you. Be thankful it's only the latest computer game from Kayde. You'll gasp with relief when you come to the end of the struggle against some of the most dangerous monsters ever programmed. You can be a wizard, thinker, barbarian, warrior or cleric. But you've got to be good. No silly problems to hinder your progress. It's just you against the Valley.

Specially designed for Commodore VIC 20, Dragon 32, Newbrain, Oric 48 and 48k Spectrum. Step into The Valley for just £9.95.

**KAYDE KEYS - THE FUNCTION JUNCTION**  
Get the best from your VIC 20 with Kayde Keys - the program that saves time and effort on function keys and characters. The function keys will run, list, save and load your programs and enable you to write your own software. Just load and run. Kayde Keys works on just over 300 bytes and costs only £8.95

Mail Order + Showroom

### COMBAT SEQUENCE

Once all movement is complete, a check will be made for possible attacks. Different parts of the screen are flooded on the screen as the search is made. When a piece is found that has opponents within range, a letter will be placed to the right of each defender. There are two types of combat:

### 1. ATTACKING AT ONE HEX RANGE

This is compulsory. If there is only one defender the attack takes place automatically. If there is more than one, the piece will flicker "WHO", to which you must reply with one of the letters appearing on the screen. The result of the attack will appear at the bottom of the screen. Tomahawks may only attack at one hex range.

## 2. ATTACKING AT TWO OR THREE HEX RANGE

This is optional. If you do not wish to attack, press "ENTER"

**DEFINITION**  
A defect

A defender is permitted to return the fire once during the attack sequence. This is compulsory if on a hex, but all two or more the place will flicker "RTN". If you wish to return the fire, press "Y" or else press any other key. Having replied, there will be no defence in further attacks.

**T**he movement routine is complete. Now we must approach the much more difficult part of the program which takes care of the combat. This occurs immediately the player has completed all moves. This article is devoted entirely to machine language routines. Next we will develop and complete the Basic portion so that you will see how they fit together.

The combat sequence involves examining up to 30 hex around each man looking for opponents. A diagram of this area is shown in figure 1. You will see that I have divided it up into 6 segments and labelled the hex in each A, B, C, D, E and F.

There are, of course, really 36 hex but because the hex is elongated due to the shape of the video pixel, one finds that a distance of three hex North or South is unrealistically far, so the top and bottom hex are ignored. If you want to have them, the adjustment is easy.

At this point, we must get into some heavy machine code. In order to make an attack, we need to know several facts about the opponent i.e.

1. His position on the screen. (2 bytes)
2. The position of boulders which provide cover. (2 bytes)
3. The distance between the two pieces.
4. The index of the defense.
5. The direction of the attack.

When we come out of the *X5* routine we will have this information in a table called TB. The first byte in this will

# WARPATH

*No wargame is complete without a good battle. In part six of his Warpath game, Ron Potkin tackles the combat routines as the cavalry and the braves move to adjacent hexes.*

contain the length which we divide by seven to obtain the number of defenders.

The code in *X5*(18) calls five sub-routines held in *X5*(10) through to *X5*(14). Some of these are very simple and I could have repeated the coding in the *X5*(16), but the length would have exceeded the maximum which can be held in one string.

Incidentally, this routine was first written and tested in Basic and then translated. For example

```
X5(12)  C = C + 1
        IF C = 7 THEN C = 1
        RETURN
```

```
X5(13)  C = C - 1
        IF C = 0 THEN C = 6
        RETURN
```

I prefer this method. The idea is that I can get the logic correct in Basic so that when writing the machine code, I need only concentrate on the syntax. It looks complicated because machine code re-

quires that you work at a much greater level of detail. Let me outline what happens:

1. Register BC counts the number of segments i.e. 6 (see lines 300-300 of RANGE). This is also the direction indicator. Assume that BC equals 1.

2. Register D contains 1 if we are checking a near boulder hex (A). Register E contains 1 if it is a far hex (B or D). These will be stored in the table if a boulder is found.

3. The routine TEST uses BC to obtain the offset. This gets us to A. It calculates the IBOARD and VIDEO positions as it proceeds. If there is a defender here, we need to look no further because the attack is compulsory.

4. Now we continue up to hex B and C using the same offset. Any defenders are saved in TB. We now go back to the start (using INIT). We call TEST which takes us to A and then increment C and call TEST again which takes us to D. Similar methods are used to reach E and F.

Just one point: the routines use the same names as the Basic program. This was necessary in order to stop my head going in circles! Do not confuse the two.

The six sub-routines are in this month's listing. As usual, load the tape containing Parts 1 to 5 before you start. Sorry there are several lines of numbers — so take it easy. Type in a few lines at a time and save at regular intervals. You will see that I have adjusted lines 4000 to 4020 which will check that the DATA is correct. Make sure that the *X5* strings are the following lengths.

| <i>X5</i> | 10 | 11 | 12 | 13 | 14  | 16  |
|-----------|----|----|----|----|-----|-----|
| Length    | 17 | 46 | 9  | 10 | 128 | 220 |

Once you have RUN this program, delete lines 791, 1055/6 and all lines from 2000 upwards. The only code remaining should be up to 1690 in multiples of 10. Now save this as well. You will be pleased to know that this completes all machine code — the remainder is now in Basic.

SOFTWARE

## Invading your space NOW!

### MEGAPEPE

No matter how fast I fired, the Megapepe kept on coming! I was gaining ground, though, when suddenly the Soder appeared on collision course zero! Turn - dodge - I out-manoeuvred, I blasted him. But just then Scorpi appeared dropping her indestructible fiend. 100% Nine levels of play plus high score. 100% machine code. Full colour and sensational sounds. Rated by TV Choice as "a superb rendering of the popular arcade game". Realisation, Andrew Beale

### MONSTERS IN HELL

It was like a nightmare - trapped in a Hellish scene... chased through a maze of platforms and ladders by Vampire Monsters. But I had my Magic Hammer, and The Power was on my side. The Monsters were falling at my feet! When suddenly the Mad Monk sent forth his ghoulie... Amazingly amazing addictive game, a super-fast machine code, with full colour graphics and superb sound. Realisation, Martin Lewis

This must be the most spectacular arcade action game, ever to be produced on cassette for the B or 16k expanded VIC 20.

As captain of a star ship lost in space, you encounter a minuscule force of winged creatures, known to the galaxy as the COSMIC FIRE BIRDS. They loop the loop. They figure out eight. They swoop. They dive. can YOU survive. Full screen display, 99 progressive levels of play, 5 lives, Bonus ship at 5,000 points, swimmers, bombers, leaders, hawks.

This is arcade action like it's never been seen before. 100% VIC. Superb colour graphics and sound.

SPECTRUM Software

## COSMIC RAIDERS (16K) £5.95

You — the only remaining pilot of the 'Earth Defence Fleet' — have the daunting task of defending the Earth from attack by alien beings that have already set up a base of their own on earth.

- \* Radar Sonar display is hi-res \*
- \* Full colour and sound effects \*
- \* From the author of Spectrum 'Scramble' \*
- \* 100% machine code \*

## SPACE ZOMBIES (16K) £5.95

Shooting through space you are attacked by a fleet of Space Zombies flying at you in formation, evading and diving at you. Warning them, if you wait. But in destroying them, you attack them in the zone, and the zone gets progressively harder.

- \* Full screen hi-res graphics \*
- \* 1 or 2 players \* Jugoslav option \*
- \* Full sound and colour \*
- \* Three playing speeds \*

## MINES OF SATURN and RETURN TO EARTH £5.95

Mines of Saturn. While playing a routine orbit at Saturn, you are caught up in a radiation storm which forces you into the gas planet's ring. Your energy drained, you make a forced landing on the planet's surface. Luckily you crashed near an abandoned mining base and you set off in search of some dishium crystals to refuel your stranded space ship. Can you do it?

Return to Earth. Having escaped from your previous dilemma, you reach Earth Station 1, but fail to make radio contact. You affect a safe if necessary manual docking. On entry you find it deserted, and the control room destroyed. You must explore the station and find some way to shift Earth off your predicament, but beware, many of the rooms are identical, there is extensive damage, and signs of alien intruders.

## Subtle Adventure (48K) MAD MARTHA £6.95

Poor Little Henry is the hap-patched hero of this dandy tale. One night he can take no more, he stabs his veins with his wife's pin, leaps out of the house, taking careful not to wake his baby or trip over the cat, just heads for the happy hotel in town town town. Trouble is he gets out of his room, his only way to save some cash is to quickly hit his remaining pounds on the spinning wheel of the roulette table. Just as Henry is getting into his evening fix — Mad Martha — that night — the pin — Revolving Henry has disappeared with the housekeeping the note not effect him with no one. (Think what past you play in this happy note? That's right, pin the Henry. Watch out for that one!

## NOW COMPUTERS CAN "SEE"

Most modern day robots look nothing like those science-fiction monsters — all metal and malevolence. Our conception of a robot is of a deaf and blind slave — but it is possible for robots to "see".

They use this accomplishment to move around in their environments and to assemble the parts making up fairly complex items.

A computer "sees" in exactly the same way that it does everything else —

FIG 1. LABELINGS

FIG 2. CORNER LABELINGS

by running a program. In this case it must be presented in some way with an image of what it is seeing and run a program which can tell it what this image means.

The image can be presented by a video camera. However, it is a task beyond the current state of the art to interpret raw video pictures directly.

If such pictures are first processed to reduce them to line drawings, then it is a quite straightforward matter to interpret them.

In this article I'll explain how line drawings of three-dimensional objects can be interpreted so that a computer can be programmed to know what it is seeing. Next I will examine how ordinary pictures of an object can be reduced to line drawings.

In a line drawing of a three-dimensional object, each line can represent one of the following

- An edge projecting outwards at the join of two surfaces. Such lines are indicated by labelling them with a '+'. (B) An edge projecting inwards at the

FIG 3. THE THREE PHASES

join of two surfaces. Such lines are indicated by representing them with a '+'.

(c) An edge at which one of the surfaces hides another. Such lines are labelled with an arrow. The direction of the arrow is such that when walking along the edge the surface which hides the other is always to the right.

These labellings are illustrated in figure 1. A brief examination of the diagram will show that the shape which you automatically assign to the object that is represented in the figure is confirmed by the labelling of the lines.

Having seen that the labelling corresponds with the way that we see an object, what is needed now is a procedure for automatically labelling any line drawing of a three-dimensional object

The labelling can then be done by a program, and once the labelling is done, the shape of the object can be understood.

The key to doing the labelling automatically is in the way that the corners where edges meet can be labelled. The corners marked A and B in figure 1, for example, both show three converging edges all of which are labelled with '+', so that they are projecting outwards to form a corner of the kind possessed by a cube.

In fact, there are 18 permitted ways for labelled edges to converge at a corner. They are all illustrated in figure 2. All other possible corner labellings correspond to situations that are physically impossible.

With the aid of this list of valid corner labellings, we can give a method for the automatic labelling of a line drawing. It is:

1. Label the perimeter of the drawing with arrows forming a clockwise ring.
2. Complete the corners on the outside with corner labellings selected from figure 2.
3. Work inwards to label the remaining corners with valid labellings until the labelling is complete.

These three phases are illustrated in figure 3. Step 3 required two passes in

FIG 4. EXAMPLES

the figure illustrated.

You might care to try your hand at the examples in figure 4, and to test the results by comparing them with the way that you see the objects

# More K's.

ATARI 800™, no price increase, upgraded from 16K to **48K RAM.**

# Less £'s.

ATARI 400™ reduced from £199.99 (SRP inc. VAT) to **£159.99.**

It's hard to know which set of figures is more attractive. Certainly the ATARI 800™ Computer, upgraded by an astonishing 32K without any increase in price, will have its admirers.

However, £40 off the ATARI 400™ Computer makes it remarkably value for money, particularly when you take into account its 16K RAM (on some computers you'll be charged extra to upgrade to 16K).

It's even more remarkable when you look at our computers feature by feature.

### The Family Computer.

Before we designed them, we thought about who was actually going to use them.

One day our computers might be playing games; next, they're wrestling with household budgets; teaching geography to an 8-year-old; or printing letters.

In other words, we designed our computers and software for as many applications as a family has ideas. (Now the ATARI 800 Computer has 48K RAM, there's even more memory for even more applications.)

Next we built in high-resolution graphics. Inside our computers, we have a microprocessor whose only job is to operate our graphics.

(All told, you can choose up to 16 different colours in 16 intensities, which gives you a spectrum of 256 different shades.)

In fact, our computers divide the screen up into 60,000 tiny points, each one of which can be changed without affecting the other.

### A friend not a fiend.

We also looked at ways to make computers rather friendlier.

On the ATARI 400 Computer, we've incorporated touch-sensitive keys with ridges, so fingers won't slip; on the ATARI 800 Computer, we have keys much as you'd find on a standard typewriter.

You can talk to your computer in a choice of languages (five for the Atari 400, nine for the Atari 800), including ATARI BASIC, using software which you load in on cartridge, cassette, or disk.

For our computers, we have one of the largest software libraries in the world: everything from speech synthesis to sophisticated data management.

No doubt you know all about our famous games such as PAC-MAN; SPACE INVADERS; and STAR RAIDERS™ winner of the 1982 Game of the Year Award.

However, we also boast home and office application software as well

### Atari 400 and 800 Home Computer Technical Specifications.

**Colour Capabilities:** Choose from 16 colours, and 16 intensities (up to a total of 256 shades).

**Sound:** Four independent sound synthesizers for musical tones and games sounds. Three and one half octaves. Variable volume and tone for each voice.

**Display:** Three text modes: 24 lines of 40 characters, double-width characters, or double-height, double-width characters. Nine graphic modes, from 40 columns by 24 rows up to 320 columns by 192 rows.

**Memory:** Includes a built-in 10K Read Only Memory (ROM) Operating System with 48K Random Access Memory (ATARI 800) and 16K Random Access Memory (ATARI 400).

**C.P.U.:** 6502B Microprocessor 0.56 micro-second cycle 1.8MHz.

**Special Features:** Three customised integrated circuits  
**Extended Graphics Functions:** High-resolution graphics. Multi-coloured character set. Software screen switching (mixed text and graphics modes).

Multiple re-defined character sets. Player missile (sprite) graphics. Fine screen scrolling in any direction. Changeable color registers. Smooth character movement.

**Peripherals:** A range of peripherals and accessories that are available now.

as educational programs to satisfy the most enquiring mind.

You can learn French, Spanish, German or Italian on our computers and through our unique 'sound through' system you'll hear the language and learn it the way you learnt your mother tongue. (Other computers will leave you speechless.)

You can teach yourself touch typing, compose and play your own music or teach a child the alphabet.

On another program you can find out if your current mortgage is giving you the best value for money; while yet another program will answer a question that has vexed mankind for generations: "Where does all my money go?"

At the same time, the outstanding VisiCalc® program is available for the ATARI 800 Computer.

### Write your own programs.

As if all that isn't enough, through Atari's Program Exchange (APX), you can have access to a wide range of the most imaginative programs written by our users.

Or you can learn to write your own programs with the help of our 'Invitation to Programming™' series, using our unique 'sound through' system.

Surprisingly, you won't have to plough through a small library of manuals to do so, since most of the series is on software, not in hard books. Of course, we've always had just about everything you're looking for in computers.

From today, we've got even more.

### More of what home computers are for.

# MACHINE CODE

We have not yet covered all the different types of machine code instruction, but we have looked at enough instructions to be able to write some useful routines.

Instead of looking at new instructions this month we will look at how to use the routines built into the computer's ROM in conjunction with the instructions we already know.

## ROUTINES AND HARDWARE

All computers have built in routines to handle such basic operations as printing a character, reading the keyboard, tape input and output, etc.

The details of these routines depend on the hardware of the particular computer, and they are usually quite complicated.

For example, the routine to print a character on the screen has to produce the actual dot pattern for the character, keep track of the cursor position, provide automatic carriage return/line feed at the end of each line, provide automatic scrolling at the end of the screen, and also has to handle various non-printing control codes.

Before you can use these routines in your own programs you need to find their memory addresses and how to pass values between these ROM routines and your program.

The manual for the BBC micro gives details of how to use several ROM routines, but with most small computers you have to rely on what users have found out for themselves and published in magazines or books.

## PRINTING THE MESSAGES...

In the example program printed here I will assume that to print a character on the screen you have to get the ASCII code for the character into the accumulator and call a subroutine called **OUTCH**, and I will also be assuming that **OUTCH** does not alter any of the registers. Most computers do have a routine that works like this.

Suppose we have a message stored in the computer's memory, and we want to print the message on the screen.

**BY TED BALL**

We need to know the address where the message starts, which we will call **MESSGE** (abbreviated because assemblers normally allow only six characters), and where the message ends.

There are several methods you can use to indicate the end of a message, for example, put zero after the last character, or add 128 to the code for the last character (this will not usually cause any confusion as the codes for the normal printing characters are less than 128).

The examples here mostly assume that you know the actual length of the message and the routines count the number of characters printed. The form of the routines is

**Initialise pointers**  
**Repeat**

**Read character**  
**Print character**  
**Advance pointer**  
**Until end of message**

We can now look at the routines in detail.

## LET'S GO FOR A LOOP!

6503

Routine (a) is quite simple: we use the X register as a pointer and load the character to be printed into the accumulator using absolute indexed addressing.

The character is printed by calling the ROM subroutine **OUTCH**, and we then increment the X register to point to the next character and compare the value in the X register with the length of the message.

If the value in the X register is not equal to the length of the message we loop back to process the next character.

Routine (a) can only be used when the message is less than 256 characters long, as the registers in the 6502 are only 8-bits long.

If the message is more than 256 characters we can use routine (b), which is more complicated as we have to handle 16-bit numbers in two 8-bit sections. The characters of the message are read into the accumulator using indirect indexed addressing (or post-indexing).

This requires the base address to be stored in two consecutive page zero locations, which are called **MESSAD** and **MESSAD+1** in the routine.

The first few lines in routine (b) calculate some constants which are used later. A standard 6502 assembler will allow calculations of this type, and will

also allow the calculations to be performed in operands.

The numbers involved in the arithmetic must be between 0 and 65535, and division always returns an integer result, any fractional part being discarded.

Thus, if **MESSGE** were \$1234, the first two lines of routine (b) would give **MESSHI** as \$12 and **MESSLO** as \$34, separating the address into its high and low bytes.

After the initial calculations routine (b) puts the low and high bytes of **MESSGE** into the page zero locations **MESSAD** and **MESSAD+1**, and sets the Y register to zero.

After a character has been printed the pointer is advanced by incrementing the contents of memory location **MESSAD** (the low byte) and if the low byte becomes zero the high byte also has to be incremented.

The test for the end of the message also has to be done in two parts. The high byte of the current address is compared with the high byte of the address of the end of the message (which was calculated at the beginning); if they are not equal the routine loops back to process the next character; if they are equal the low bytes have to be tested.

## DEFICIENCIES OF THE Z80 SET

Z80

Routine (c) uses the HL register pair as a pointer to the current character and the B register as a counter for the number of characters. Note that, as the compare instruction **CP** performs a comparison with the accumulator, the contents of the B register are copied into the accumulator in order to perform the comparison.

The B register is 8-bits long, so routine (c) can only be used if the message is less than 256 characters.

Routine (d) will handle messages with more than 256 characters. The BC register pair is initially loaded with the address of the end of the message and after a character has been printed and the HL pointer incremented the routine tests to see if the contents of HL are equal to the contents of BC.

The test is a little complicated because of deficiencies in the Z80 instruction set.

The Z80 has no 16-bit compare instruction. However, you will remember that a compare instruction works by performing a subtraction, and keeps the

# MACHINE CODE

## ROUTINE (a) — 6502

```

NEXTCH  LDX #0                      ; Get character
        LDA MESSAGE,X              ; Print it
        JSR DUTCH                  ; Advance pointer
        INX                        ; Test for end of message
        CPX #LENGTH
        BNE NEXTCH
    
```

## ROUTINE (b) — 6502

```

        MESSHI = MESSAGE/256
        MESSLD = MESSAGE + 256*MESSHI
        MEND = MESSAGE + LENGTH
        MENDHI = MEND/256
        MENDLD = MEND + 256*MENDHI

        LDA #MESSLD                ; Initialize Pointer
        STA MESSAD
        LDA #MESSHI
        STA MESSAD+1
        LDY #0
NEXTCH  LDA (MESSAD,Y)              ; Get character
        JSR DUTCH                  ; Print it
        INCMESSAD                  ; Advance pointer
        BNE TEST
        INC MESSAD + 1
        LDA #MENDHI
        CMP MESSAD + 1             ; Test for end of message
        BNE NEXTCH
        LDA #MENDLD
        CMP MESSAD
        BNE NEXTCH
    
```

flags but not the actual result of the subtraction. Thus, a 16-bit comparison can be performed with a subtraction.

The Z80 has 16-bit Subtract With Carry operations but no 16-bit Subtract, without carry.

Thus routine (d) uses the instruction AND A to clear the carry flag, and SBC HL,BC to compare the contents of HL and BC. If the contents of HL and BC are equal we have reached the end of the message and jump to the end of the routine.

If we have not reached the end of the message we must remember that SBC HL,BC has altered the contents of HL, so we must restore the value of HL with the instruction ADD HL,BC before looping back for the next character.

## INDIRECT AND DIRECT...

6809

Routine (e) will print a message of any length, and uses auto-increment addressing, which allows us to read a character and advance the pointer in one instruction.

After printing a character the routine tests for the end of the message by comparing the contents of the X register with (MESSAGE+LENGTH), the address of the end of the message.

The auto-increment and auto-decrement instructions are very useful in handling messages and tables of all kinds.

The operand forms are  $R+, R++$ ,  $-R, --R[R+]$ ,  $[-R]$  where R may be any one of the 16-bit registers X,Y,S,U.  $R+$  takes the contents of the memory location pointed to by register R and then increments R;  $R++$  takes the contents of the memory location pointed to by R and the next higher memory location, and increments R twice.  $-R$  and  $--R$  work similarly but register R is decremented before the memory reference takes place.

The indirect forms  $[R+]$  and  $[-R]$  use the memory location pointed to by the contents of the memory locations pointed to by R.

Indirect auto-increment and auto-decrement only increment or decrement twice because the indirection requires a two-byte operand.

```

# DRAGON OWNERS . . . HAVE WE GOT A GAME FOR YOU!

AT WINTERSOFT WE AIM TO PIT YOU AGAINST THE DEADLIEST ADVERSARIES, KEEP YOU GUESSING, AND STRETCH YOUR CREATIVITY TO THE LIMITS.

## THE RING OF DARKNESS

The game created to be the most complete, thrilling, addictive and detailed adventure ever written for the Dragon 32. A whole graphic world of nearly 3000 travel days with kings, princesses, mad priests and dangerous quests will unfold before you. Across oceans, mountains and forests you travel to many towns and dare the depths of evil dungeons (more than 8 levels deep with over 20 different treasures in 100+ 3D graphics) in search of fortune and the hidden curse of the Dark Ring. Many hours of mystery, suspense and real excitement await you.

The most impressive adventure tested soon depicted brilliant TV in our house. Your Computer (April) £10.00

## DRAGON TREK

Your ship has just entered quadrant 8.9. You are surrounded by 8 battle cruisers of the Klingon Empire. Do you fight or run? They launch a salvo of photon torpedoes. You're HIT! Get a damage report. It's OK, the shields are holding. The next move is up to you, but be quick or they will attack again. Full graphics, detailed computer and flag time interaction will have you enjoying Klingons in the standard 2477.

Excellent value for money. The title sequence was magnificent! Your Computer £6.99

## PEPPER'S GAME PACK

Hope built multi-forme mad wizards, bouncing bricks, chessboard strategy, doomed space shuttles and mind boggling codes. They're all to be found on this great compendium of six games: Madragon, Muncher, Mad the Naughtmare, Pepper's Breakfast, Chessboard Tracker, Chessboard Run and Madragon.

£7.95

## ARTIST'S DESIGNER

Produce creative designs in 16-bit graphics and save them on cassette. Full set of features include text messaging, joystick or keyboard control, outline, pen and shape replication. Ideal for home video captions, education, charts and diagrams.

As prices include p.p.p. VAT and the WINTERSOFT guarantee of quality and reliability. Assistance from good software partners, or send cheque P.O. to

## TURN YOUR ATARI VIDEO COMPUTER SYSTEM INTO A STATE OF THE ART GAME SYSTEM - FOR THE PRICE OF A GOOD VIDEO GAME.

Why invest hundreds of pounds in a home computer when you can play the Starport Supercharger into your Atari VCS?

- What is the Supercharger?  
The Supercharger makes the game play more realistic and VCS. It is the Supercharger's internal digital electronics which modify the RCH 7700 memory 48 times. Plus, its extra interface cable allows the Supercharger to play on the complete set of the Atari VCS system.
- A lot more to it!  
The Supercharger lets you play games with high resolution graphics, sound effects, and far more complex.
- The Supercharger upgrades existing Atari VCS games to a new level.
- Atari VCS games are now play games with high resolution graphics, sound effects, and far more complex.
- Atari VCS games are now play games with high resolution graphics, sound effects, and far more complex.
- Atari VCS games are now play games with high resolution graphics, sound effects, and far more complex.

Starport Supercharger with Supercharger computer games - one of the greatest systems ever to enter the field of home gaming. Under Review with the Atari VCS. The best of the Supercharger VCS is still there, the most challenging games you've ever played.

**ESCAPE FROM MINDMASTER**  
COMMUNIST MUTANTS FROM SPACE £14.95  
KILLER SATELLITES £14.95  
DRAGONSLAYER £14.95  
SUICIDE MISSION £14.95  
PHASER PATROL £14.95  
FIREBALL £14.95

## CARTRIDGES FOR ATARI, INTELLIVISION, AND COLECOVISION

All prices include post and packing but exclude VAT

# DRAGON OWNERS

## ... HAVE WE GOT A GAME FOR YOU!

AT WINTERSOFT WE AIM TO PIT YOU AGAINST THE DEADLIEST ADVERSARIES, KEEP YOU GUESSING, AND STRETCH YOUR CREATIVITY TO THE LIMITS.

### THE RING OF DARKNESS

The game created to be the most complete, thrilling, addictive and detailed adventure ever written for the Dragon 32. A whole graphic world of nearly 3000 travel days with kings, princesses, mad priests and dangerous quests will unfold before you. Across seas, over mountains and forest you travel to find many towns and dare the depths of vast dungeons (more than 9 levels deep with over 20 different treasures in its 3-D graphics) in search of fortune and the hidden curse of the Dark Ring. Many hours of highly suspenseful and new excitement await you.

The most impressive adventure tested soon depicted broadcast TV in our house. Your Computer (April) £18.00

### DRAGON TREK

Your ship has just entered quadrant 8.9. You are surrounded by 8 battle cruisers of the Kingdom Empire. Do you fight or run? They launch a salvo of proton torpedoes. You're hit! Get a damage report. It's OK, the shields are holding. The next move is up to you, but be quick or they will attack again. Its graphics, detailed computer and key line interaction will have you raving. Mine the standard 3-D. Excellent value for money. £16.00

### PEPPER'S GAME PACK

Huge blue multi-board mad wizard, bounding bricks, chessboard strategy, doomed space shuttles and mind boggling codes. They're all to be found on this great compendium of 7 games. Minimum Master. Had the Wizardmaster. Pepper's Breadboard. Chessboard. Tractor. Chessboard. Run and Master (June) £7.95

### ARTIST'S DESIGNER

Produce intricate designs in 3-D graphics and save them on cassette. Full set of features include text editing, joystick or keyboard control, on-line paint and shape replication. Ideal for home video captions, education, charts and diagrams. £8.95

At prices include p.p. VAT and the WINTERSOFT guarantee of quality and reliability. Available from good software outlets or direct cheques P.O. to:

When you play chess with the Dragon 32 Family Computer, you're taking on a real challenge.

Because Dragon's Chess program was put together by a genuine Grand Master.

This doesn't mean you have to be Boris Spassky to enjoy a game, however.

Dragon Chess offers 9 different levels of difficulty.

So whether you're just a beginner or a champion, you can be sure we'll match you with a worthy opponent.

#### THE FIRST FAMILY COMPUTER.

While the Dragon teaches you better chess, you're also learning something else. You're becoming familiar with the new technology of computers - technology that's becoming increasingly important in all our lives.

The Dragon 32 is the first family computer. It's easy to

use. It's easy to learn - thanks to its beautifully simple instruction manual. And once you get going, it's very hard to stop.

You'll be surprised how quickly you and your children pick it up. And nowadays, you

# Our chess program

can hardly offer them any more valuable experience.

#### SOFTWARE TO MATCH

The Dragon's 32KRAM memory means that it's a serious computer. But it also offers a lot of fun.

A whole range of

games software, with popular arcade-type games like Meteoroids, Astroblast and Cosmic Invaders.

And complex and mystifying Adventure games like Calixto Island, Madness and the Minotaur, and Quest.

Our new software range doesn't stop there. There's our Personal Finance program, to help you organise the

family's finances. Educational programs like our Typing Tutor, which uses the Dragon's own keyboard to teach you to type.

And every month, we're adding more and more new titles to our range.

Next time you feel like a game of chess, make friends with a Dragon.

It could introduce you to a lot of new mates.

## DRAGON 32

The first family computer.

...has plenty of mates.

# WARE SOFTWARE SOFTWARE SOFT REVIEWS

## MORE EMPIRES TO CONQUER

### ROMAN EMPIRE

Roman Empire is the latest period war game from M. C. Lothlorien

This Cheshire based company have become specialists in computerised war games with other titles in the range such as Peloponnesian War, Tyrant of Athens, Samurai Warrior, and Japanese Challenge

Roman Empire is a strategy war game requiring thought and application.

Graphics are therefore not as crucial to the game as they are in other games. Even allowing for this the graphics in Roman Empire are very unimpressive.

All you get are columns of figures with a list of menu options around which the game is based.

A few more illustrations would have made the various columns of figures far more accessible. The odd map would have been very much appreciated as well.

The game has now been converted to the Diagon and Atari computers and some of the above suggested improvements have now been incorporated in these new versions. Why it is not possible to upgrade the Spectrum version is anyone's guess.

The idea of the game is to conquer the six countries that are hostile to you in order to do this you must wipe out your enemies troops. You must build up your legions and launch campaigns in the regions you are attempting to annex.

A constant check has to be kept on your legions morale, lighting efficiency, energy level and status.

The only graphic display Roman Empire does give you is when you press the "next period" button — which totals your victories and defeats. What the display was supposed to be, however, I couldn't tell you. My girlfriend thought it looked like a screen full of ants. Any suggestions?

Confirmed war gamers may get something out of this one. For the uninitiated though — it would have to have greatly improved on-screen instructions and

graphics before I would reach for my wallet

## CLASSIC ALIENS BEGIN A BRAND NEW INVASION SPACE INVADERS

The latest release from Buy-Byte for the BBC micro is a version of that granddaddy of all video games — Space Invaders.

You would not normally expect a software house to launch a copy of this classic game when several other adequate versions already exist unless it was a particularly good version. This version does not fall into that category.

Buy-Byte has not made the most of the BBC's colour and sound potential.

The machine is easily capable of producing a truly de-luxe version of Space Invaders though this cassette is sadly unworthy of that description.

The mystery saucers did not appear at the correct times and lacked the sound and movement of the arcade original.

In the games favour, it was fast and the aliens exploded cleanly when hit.

Despite this I couldn't help thinking that for £7.50 I was entitled to something more than the same old format. For an extra couple of pounds practically any game from the Acornsoft range is better value for money.

# FTWARE SO FTWARE SOFTWARE SOF REVIEWS

## BEWARE THE DEADLY BUG-TRAIN!

### STAR MAZE

If you fancy trying your hand at blasting a weird assortment of aliens and gaining lost in the graphics of a maze then Star Maze is the game for you.

The idea of the game is to pilot your space shuttle through an enormous scrolling space maze — mining the jewels that appear every so often and taking them back to your mother ship.

The screen is divided into two sections. The left two-thirds of the screen displays the maze and your ship and the remaining third displays all relevant game information — score, high score, amount of fuel left, number of bullets left, ships, and various types of aliens downed.

Various aliens are attempting to thwart your mission in the shape of asteroids, cruisers, and toughest of all — bug trains.

There is only one effective way to deal with the bug trains and that is to use one of your three smart bombs on them. A single bullet will only cause the bug train to split taking out a Pandora's box of nasty aliens.

You are armed with a sophisticated laser capable of single fire and also rapid fire. This enables you to use your limited supply of ammunition most effectively. You begin the game with three smart bombs but can earn an extra one each time you clear one level.

There are sixteen levels in all though you will need to be a pretty skilled space ace to get that far. After weeks of play I'm still stuck on the sixth.

Ship control is the most difficult part of Star Maze and it took me quite some time to master the technique. You could really do with a third, or even fourth hand there as that many controls to keep a spare finger on.

You have short and long distance thrust, rotate left and right, single fire, rapid fire, hyperspace, smart bomb, and even a freeze button which enables you to pause the game to answer the phone or plan your strategy for an imminent alien onslaught. Sound and graphics are not outstanding.

I was hooked on Star Maze from the very first session. Once I'd mastered the controls the game became more and more fascinating and I can confidently recommend it as one of the best games now on sale for the Apple.

Manufactured by Sirtech for TSR the game is sold by SBO of London at £21.00.

## FRUSTRATED BY THESE POWERFUL SPEEDBOATS!

### POWERBOAT RACE

Futura Software's Powerboat Race gives you the chance to pit your wits against the world's top powerboat racers on the BBC model B.

The program loaded first time and presented a detailed title page with full playing instructions. You are invited to enter the World Powerboat Championships. You can also choose the one or two player game and name your drivers before the computer chooses your opponent.

You'll need joysticks and 32k to play the game and I found it difficult to control the boat at first — although this was due more to the joystick than the program.

Making life more difficult on the high seas as you race along are two bobbing yellow buoys which must be negotiated to clock up those all important laps.

Each race consists of three heats of 15 laps and points are scored according to your position at the end of the race, 400 for first place, 300 for second and 200 for third. The driver scoring the most points over the three heats wins.

Screen presentation was quite good with your score and number of laps completed displayed at the bottom of the screen during each race.

The game was more frustrating than addictive because of the poor control afforded by the joysticks.

| <b>PARACUDA</b> (Hobbs)  | £ 9.99            |
| Great in action type game  |                   |
| <b>ATARI 400/800</b>   |                   |
| <b>MINER 2048</b> (Big 5)  | can £32.95        |
| A must for all Atari owners. The best game we've ever seen!                                  |                   |
| <b>ZAXXON</b> (Hobbs)  | can £27.95        |
| Superb looking 3D graphics. Just like the game's really thing                                |                   |
| <b>PODDMAN</b> (Computer Magic)  | can £28.75        |
| Turn out the great things in your page. Superb graphics                                      |                   |
| <b>OUT</b> (Hobbs)   | can £28.95        |
| Cover as much of the screen as possible before being obliterated                             |                   |
| <b>WAY OUT</b> (Hobbs)   | 48K disk £27.50   |
| This game is so realistic that your head will be spinning!                                   |                   |
| <b>T199/4A</b>   |                   |
| <b>EXTENDED BASIC</b> (T)  | £80.99            |
| Adult entry cassette to T1 BASIC. Recommended for any serious applications                   |                   |
| <b>PARCITY</b> (T)   | £28.95            |
| Superb Defender type game. Speech option   |                   |
| <b>ALPINE</b> (T)  | £28.95            |
| One of the most exciting simulations on the way  |                   |
| <b>BOOKS</b>   |                   |
| <b>6502 ASSEMBLY LANGUAGE PROGRAMMING</b>  | (inc post) £18.50 |
| With LISA A. Level 1   |                   |
| You don't need a book. I'll show you how to learn machine code. All of the 6502 instructions |                   |
| are explained in detail  |                   |
| <b>INTRO TO FORTH</b>  | £ 9.30            |
| Introduces the concept of the FORTH language by explaining Reverse Polish Notation           |                   |
| <b>30 HOUR BASIC</b>   | £ 5.95            |
| With cassette and book. You save all your problems by purchasing this excellent book         |                   |
| <b>THE VIC REVEALED</b> (auth. Nick Humphreys)   | (inc post) £10.95 |
| Find out all the tricks. Computer and its use  |                   |
| <b>SPECTRUM MACHINE LANGUAGE FOR THE ABSOLUTE BEGINNER</b>                                   | (inc post) £ 7.95 |
| Learn how to programme your Spectrum in machine language. Recommended                        |                   |

ALL THE ABOVE  
PROGRAMMES CAN BE  
ORDERED BY POST

Add 50p (incl. p.p.) to 1st post and  
10p to each subsequent book.  
Allow 10-15 days for delivery.  
Approved by cheque or credit card.

PALACE

## GAMES PROGRAMMERS

Palace Software, part of a leading firm and video company, is looking for games for Atari 400/800, BBC Model B, Spectrum, VIC 20 and C64 for distribution in the UK, Europe and USA. High royalties will be paid for top quality, high original machine code games. Send cassette samples to:  
Peter Stone, Palace Software  
82-84 Kensington High Street, London W8  
(Tel. 01 937 6258)

20

Can you beat that?

TAKE UP THE  
CHALLENGE OF POSTERN'S*Imaginations Unlimited*

...and see if you can beat Luke's super scores!

**SHADOWFAX**

Fight the black riders whose touch is death. You must guide Shadowfax as Gandalf's swift white horse braves the dread riders of Sauron, Dark Lord of Mordor. How many will your thunderbolts destroy? Magnificent graphics.

*Luke says - 'It's T-reffic. The better you do, the bigger the challenge.' 2130 to beat! Do you have the lightning-fast eye to beat Luke at his favourite game?*

**SNAKE PIT**

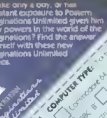

Imagine yourself in a snake pit. The snakes and their eggs must be gobbled up before the snakes eat the Globler - who must eat the last egg before the first snake. Eat the eggs, and more snakes are freed to attack. Eat all the snakes and the game begins again... but faster! Faster!

*Luke's comment: 'Better than Pacman. It's a really fun game! 18570 eggs to gobble if you want to beat my best. Get it?'*

**SEIGE**

Watchfulness and skill protect your castle from the encircling marauders in this Siege. Drop rocks to dislodge them, and their anger makes them faster... and faster! Are you fast enough to hold them back from the top of the wall? Speed your reflexes.

*Luke says - 'But you can't keep the Glems away as long as I did?' 4360 to beat! That's difficult.*

Got a good game or game idea? *Luke says* 'If it's really good, send it to me soon. I'm testing lots more games for Postern. We're big enough to pick the best from a big range of games - so watch these pages for the very best in games! Write to me with your super scores, too!

\*The computer games mentioned in this advertisement are not affiliated with any particular company.

Look for the IMAGINATIONS UNLIMITED symbol - only on games from Postern - to offer you a really super challenge!

Available from many computer stores.

To order by post please send your cheque, postal order or Access/Visa card number with this coupon.

To: Postern Limited  
P.O. Box 8, Andoversford  
Chesham, Glos, GL54 5SW  
or telephone: (0242) 82741  
(24 hour order service)

Is Luke only a boy, or has constant exposure to Postern's Imaginations Unlimited given him new powers in the world of the Imaginations? Find the answer yourself with these new Imaginations Unlimited games.

# Teach your Commodore 64 every trick in the book.

With the best software games book ever for your Commodore 64.

This mind blowing collection of game programs, written by Software wizards Clifford and Mark Ramshaw will turn your Commodore 64 into an entire arcade of electronic fun and thrills. Experience action so fast and furious it will shatter all your concepts about computer game excitement.

The Commodore 64 Games Book is packed with nerve shattering space and adventure games and includes intriguing strategy games too! Some programs even contain machine language routines.

Every game maximises all the Commodore 64's sophisticated features. Including its innovative Sprite capability. And you don't need complex programming skills, because all these programs are very easy to enter.

If you want to know every trick in our book, order your copy today. Book £5.95

All programs from this book are also available on cassette. Each cassette contains 15 programs. £8.95

**VIC Innovative Computing**  
Clifford Ramshaw

## We can teach the VIC 20 a few tricks too!

The specially designed format ensures that all the programs are very easy to understand and enter.  
These programs are also available on a set of 3 cassettes.  
Book £6.95  
Each cassette £5.95

**30 highly creative game programs that will open a new dimension of thrills and excitement for every VIC 20 owner.**  
Featuring arcade favourites like Hoppy, Nuclear Attack, Space Flight and Chess.

### Vic Games Pack

Five fantastic space games on one cassette including Invaders, Storm and Ground Attack. Every game makes full use of the VIC 20's stunning graphics and sound.

Also included are two 100% machine language programs: Alien Blitz and Space Rocks. This Game Pack is the ultimate test of nerves and skill - amazing value for only £5.95.

### Wizard and the Princess

In the multi-part medieval graphics adventure, you are a bold knight who must rescue the beautiful princess from the grasp of an evil Wizard.

To succeed you must slay the castle, slay the breathing dragons and light the evil troll to the death. A challenge that pushes you and the capabilities of your VIC 20 to the limit!

Cassette for standard VIC 20 £5.95

Linsac's ZX Companion series has received excellent press reviews

"Fast and away the best" - *Your Computer*

Thoughtfully written, detailed and illustrated with meaningful programs - outstandingly useful! - *EZUG*

"The Spectrum Games Companion" is the latest addition to the series and is aimed at the games player and programmer alike. Twenty one games designed specifically for the ZX Spectrum are included, with clear instructions on entry and play. Each program is explained fully with complete details on how it is designed and written. Introductory chapters show how to set up and use the Spectrum and how to create your own games. Later chapters cover number games, word games, board games, simulation

games, dice games, card games and god games. If you want to enjoy your ZX Spectrum and learn its secrets at the same time then this is the book for you!

Bob Maund is co-author of *The ZX80 Companion* and author of *The ZX81 Companion*. He is a Senior Lecturer in Computer Science at Teesside Polytechnic, holds an MSc degree in Computer Science, and is a Member of the British Computer Society.

DEALER ENQUIRIES WELCOME

# VORCON WARS

**A Computer Moderated Play By Mail Game for Strategists and Sci-Fi Buffs.**

The game has the main themes of exploration, trading and conflict and is played on the planet Vorcon which has land masses, seas and terrain similar to that of the Earth but laid out in hex format. The planet can be fully circumnavigated in your search for mineral and industrial wealth but you may have to be fad and snippled with weapons. There are 22 different options to help you achieve these and many other projects.

There are excellent facilities for alliances but should battle commence the game excels with aspects such as fortifications, minefields, retreats, surrender and finally death, portrayed in depth. The attentive player can use rocket and satellite technology to move men and ultimately achieve atomic superpower status with the ability to launch a nuclear offensive. No random or chance aspects are used, so that all battles achieve a strategic significance rarely heard of in other computer games.

SEE THE REVIEW ELSEWHERE IN THIS MAGAZINE

Each turn you receive a map, status reports, your previous battle results and a new order sheet. If you would like to enter Game 8, then 150 pays for your first three printouts, the rule book, a blank map sheet and postage. Or just write to me for more information.

**ZX MICROFAIR**

# Dock your games software into Britain's largest home-user database...

... *one cassette reaches thousands of enthusiasts.*

Micronet 800 is a powerful new service that opens up a whole new world of opportunities for microcomputer users.

When this huge database was launched just a few months ago, it attracted thousands of enquiries from home computer enthusiasts who could see the huge new vistas when you link microcomputers with Micronet 800...an 'Aladdin's Cave' of hundreds of games programs which can be downloaded to individual machines...hundreds of thousands of pages of news, reviews, product data and prices from the computer world and from *Prestel*...and an electronic mail-box for exchanging messages and ideas with other users right across the country.

All this for around a modest 15p a day. Subscribers are linked by telephone through a modem, making it the fastest and most direct means of selling your games software downline to machines like the BBC Micro, ZX Spectrum, ZX81, Apple II, Tandy TRS80 and PET.

Make a name for yourself in games software. Send your disk or cassette, together with the coupon to Micronet 800 at the address below.\* We will validate the program, and let you know what you stand to gain from Micronet 800.

£6.00

**VIC RESCUE—MACHINE CODE**  
Your game is under attack by a fourth dimension and your only escape is by lunar pad to the mother ship. However you must first dodge your way through the Alienoid belt and onto the landing pad before returning home. Keyboard or Joystick control. High resolution colour graphics.

£5.00

**FANTAZIA—MACHINE CODE**  
Star Wars was never like this. You are being invaded by the ultimate Alien force to create a most amazing game of Fantazia. The enemy are coming in from all angles in some of the most amazing action in the VIC 20. The end of civilisation is near and the only way out is in your hands. May the force be in you! High resolution graphics.

£6.00

**CRAZY KONG—MACHINE CODE**  
Kong has stolen Mario's girlfriend and taken her to the top of his steel fort. You must guide Mario first across the 'Easy Elevator' and over the coast and past onto the fortress. Up the ladder to your loved one. However be careful not to be killed in the process by the barrels which Kong hurls down the structure. Includes some of the best graphics ever seen on the VIC 20.

£6.00

**PENNY SLOT**  
This program is designed around a penny slot machine and gives true to life animated action. Try your luck to win a fortune. For VIC 20. With hold and nudge features for only

£4.50

**PUCKMAN—MACHINE CODE**  
The old favourite is back again. Joystick or Keyboard control. Fast action, High resolution colour graphics on the unexpanded VIC 20.

£6.00

## Fly Snatcher

(VIC-20)

Our Long Established Best Seller!

You are in a field with bushes, and only flies to live on. You must survive by snatching each fly and then diving into a bush or the edge of the field. However, a weasel also lives in the field and is determined to eat you, he will move in any direction and will even jump through bushes to reach you. Each session of fly snatching you survive leads to another with even more flies and a faster weasel.

- ★ Unexpanded VIC
- ★ Joystick or keyboard
- ★ Difficulty increases on each page
- ★ World Record 126 flies — can you beat it?

## Double Trouble

(VIC-20)

This appealing game enables two players or one player versus VIC to enter a high speed world where reactions and judgement are paramount to survival. Players must deflect their ball into fruit-like objects that appear despite "Schizophrenic Spike" who roams the play area. The game would be simple but for the growing walls and court boundaries and

"Be thankful this is only a game!"

- ★ Unexpanded VIC
- ★ High speed machine code action
- ★ 1 or 2 players
- ★ Numerous options of play
- ★ Score display
- ★ Life display

## Alien Hunter

(VIC-20)

Experience the safari of the future

Hunt the alien moving around your sector at the speed of light. Destroy the alien's drones as he lays them in your path whilst avoiding rogue asteroids. Watch out! Your fuel is diminishing and the pace is accelerating. Your chances of survival are slim.

- ★ High speed machine code action
- ★ Unexpanded VIC
- ★ Joystick control
- ★ 10 levels of play
- ★ High score display
- ★ Fuel replenishment
- ★ Fire action in any direction
